OGCA honours safest contractors, hones safety messages

DON WALL

STAFF WRITER

he Ontario General Contractors Association (OGCA) recently honoured remarkable safety performances among its members at a safety awards breakfast where the message was clear - workplace safety requires eternal vigilance and constructors cannot take any time off from the effort.

Partners in safety such as Rob Ellis, founder of MySafeWork, and guest speakers including MPP Gila Martow, parliamentary assistant to the minister of labour, Enzo Garritano, president and CEO of the Infrastructure Health and Safety Association, Workplace

Safety and Insurance Board chair Elizabeth Witmer and Ontario's Chief Prevention Officer (CPO) Ron Kelusky all made the point that the quest for safe workplaces never ends.

Garritano offered the sobering message that after a decade of declines in health and safety statistics, Ontario has levelled out in recent years.

"This is a social responsibility that we should all take on," he said. "We have to get the message

Everyone from the executive suite on down needs to be coached, challenged and inspired to aspire to safe workplaces, said Ellis.

Survey to focus on retention in the residential and infrastructure trades

ANGELA GISMONDI

esults from a new survey that's currently underway will be used to develop strategies for improving retention and recruitment in the residential and infrastructure sectors.

The Residential Construction Council of Ontario (RESCON) and the Ontario Residential Council of Construction Associations secured a grant from the Ministry of Advanced Education and Skills Development to develop a study on the retention of tradespeople in residential construction. Project partners include the Residential and Civil Construction Alliance of Ontario, the Ontario Skilled Trades Alliance and others who have helped push out the survey to the industry.

"Everyone agrees there is a labour supply challenge coming, if it's not here already," said Andrew Pariser, vice-president of RESCON.

"We said we want to understand key trends around retention in the residential and infrastructure trades. We are concerned about the number of workers that are going to retire. We are concerned about labour supply. We are concerned about training and education and we need somebody to do an independent study."

RESCON partnered with Job Talks, an educational media initiative that conducts in-depth research and interviews with workers who are passionate about their jobs, the Job Talks website indicates.

What makes this study different from other studies is that Job Talks is an academically independent third party that will administer the survey and analyze the results. The goal is for 1,000 people in the residential and infrastructure sectors to complete it and it is expected to take 30 minutes on average.

The Square Balconies

WILLIAM CONWAY/PROGRESS PHOTOGRAPHY

Balcony work progresses at the mixed-use development Montgomery Square on Yonge Street in Toronto. The Rockport Group is the developer of the 27-storey, 233-unit rental building equipped with a fitness centre, massage treatment rooms, saltwater outdoor pool, outdoor terraces with barbecues, a resident dining room, a media room and underground parking. The work also includes restoration of an existing art deco building that will contain a restaurant and retail. The project was designed by RAW Design. The interior design is by U31 and Janet Rosenberg + Studio is the landscape architect.

Arctic offshore production wells approved off Alaska's coast

ANCHORAGE, ALASKA

The first oil and gas production wells in federal U.S. Arctic waters have been approved by U.S. regulators.

The Bureau of Ocean Energy Management recently announced it issued a conditional permit for the Liberty Project, a proposal by a subsidiary of Houston-based Hilcorp for production wells on an artificial island in the Beaufort Sea.

The approval follows through on President Donald Trump's promise of American energy dominance, said Interior Secretary Ryan Zinke.

"Responsibly developing our resources, in Alaska especially, will allow us to use our energy diplomatically to aid our allies and check our adversaries," he said in the announcement.

Environmental groups oppose Arctic offshore drilling and have expressed concerns about the production record of Hilcorp Alaska LLC. State authorities in 2017 fined the company \$200,000 for violations at another production site.

Kristen Monsell, ocean legal director for the Center for Biological Diversity, said approval of Liberty sets the country down a path of destroying the Arctic.

"An oil spill in the Arctic would be impossible to clean up and the region is already stressed by climate change," she said.

The gravel island would be built in 5.8 metres of water about nine kilometres off shore. The site is 24 kilometres east of Prudhoe Bay, North America's largest oil field.

Hilcorp will develop federal leases sold in the 1990s. BP Exploration Alaska drilled at the site in 1997 and sold 50 per cent of the assets to Hilcorp in 2014.

The base of the gravel island would cover 24 acres of ocean floor, about the size of 18 football fields, with sloped sides leading to a work surface of nine acres, the size of nearly seven football fields.

To create the island, trucks would travel by ice road to a hole

HOUSING CORPORATION

Contract Reference Number: 2018-0029 – Make Up Air Replacement - London & Middlesex Housing Corporation (also referred to as LMHC) invites Contractors (Bidders) to submit sealed tenders for the Make Up Air Replacement Project at our site at 85 Walnut Street, in the City of London, ON.

Tender documents are available for download from London & Middlesex Housing Corporation website – www.lmhc.ca. For assistance, contact Nancy Strickert, Project and Facility Services Coordinator at 519-434-2765 ext 270. The tender closing date is Thursday, November 22nd, 2018, at 11:00 a.m. local time.

A site visit has been arranged to view the work on Thursday, November 8th, 2018 starting at 9 a.m. (meet at front entrance). Attendance is not mandatory but failure to attend may result in bid submissions being declared informal and being returned unopened to the proponent. Escorted alternate site visits will not be available.

HOUSING CORPORATION

Contract Reference Number: 2018-0003-1481 – Tree Removal and Pruning - London & Middlesex Housing Corporation (also referred to as LMHC) invites Contractors (Bidders) to submit sealed tenders for the Tree Removal and Pruning Contract for our site at 1481 Limberlost Road, in the City of London, ON.

Tender documents are available for download from London & Middlesex Housing Corporation website – www.lmhc.ca. For assistance, contact Nancy Strickert, Project and Facility Services Coordinator at 519-434-2765 ext 270. The tender closing date is Thursday, November 22nd, 2018, at 11:00 a.m. local time.

A site visit has been arranged to view the work on Wednesday, November 7th, 2018 starting at 10:00 a.m. Please meet in the parking lot at the rear of Unit 1 - 1481 Limberlost Road. Attendance is not mandatory but failure to attend may result in bid submissions being declared informal and being returned unopened to the proponent. Escorted alternate site visits will not be available.

cut in sea ice and deposit 83,000 cubic yards of gravel. A wall would fend off ice, waves and wildlife, such as polar bears. The surface would have room for 16 wells, including five to eight conventional production wells. At peak production, Hilcorp anticipates extracting 60,000 to 70,000 barrels per day for a total recovery of 80 million to 130 million barrels over 15 to 20 years.

Hilcorp proposes to move oil to shore by undersea pipe. The pipe would be buried to prevent gouging by ice.

At the end of production, the company would remove equipment and the wall and let waves and ice dismantle the island.

Liberty would be the 19th artificial drilling island in Alaska, including four now pumping oil from state waters.

Federal officials said rigorous conditions will be in place to keep drilling safe. Hilcorp will drill into oil-bearing rock only during solid-ice conditions. Drilling and vessel traffic will be restricted to reduce disturbances to Inupiat whale hunters.

State officials embraced the project for the new oil it would add to the trans-Alaska pipeline and the employment it will offer residents. Hilcorp Alaska estimates 200 construction jobs, 60 to 80 drilling jobs and \$1 billion in new investment.

David Wilkins, Hilcorp Alaska senior vice-president, said the company is pleased with the announcement.

"The Record of Decision is the result of years of study and due diligence by multiple federal, state and local agencies and the project team," he said in a prepared statement. "If granted final approvals, the Liberty Project will provide decades of responsible resource development and strengthen the energy future of Alaska and the United States."

Mackenzie Vaughan Hospital topping off marks milestone

VAUGHAN, ONT. smart technologies will sup-The Mackenzie Vaughan port health care professionals Hospital project in Vaughan, in co-ordinating care around Ont., recently reached the highest point in its construction. smart technologies will support health care professionals the needs of patients and families, including real-time tracking of patient locations

The project team, comprised of Plenary Group, PCL Construction, Stantec and Johnson Controls, is working with Mackenzie Health and Infrastructure Ontario to deliver the new hospital project. Mackenzie Vaughan Hospital will be the first new hospital to be built in York Region in more than 30 years and the first-ever hospital in the City of Vaughan.

The 1.2-million-squarefoot hospital is scheduled to open in late 2020 and will feature integrated smart technology systems and medical devices — a national first for any community hospital.

According to a release issued by Mackenzie Health,

port health care professionals in co-ordinating care around the needs of patients and families, including real-time tracking of patient locations for faster emergency response. The hospital will also feature modern surgical services and operating rooms, advanced medical imaging and speciality care including mental health, integrated stroke programs, pediatrics and more.

Thousands of tokens signed by members of York Region's community — including donors, hospital staff, physicians, leadership and government — were poured into one of Mackenzie Vaughan Hospital's final concrete slabs. The signed tokens represent a shared commitment to building a healthier future for Ontario's patients and families, the release states.

PCL Constructors Canada was given a special Milestone award at the recent Ontario General Contractors Association (OGCA) breakfast for its achievement of working over 10 million hours without a lost time injury. Presenting the award were WSIB chair Elizabeth Witmer and Ontario's Chief Prevention Officer Ron Kelusky (right). Representing PCL were Todd Craigen (second from left) and Sean Scott.

PCL awarded for working over 10 million hours without an LTI

Continued from Pg. 1

"If the numbers are plateaued out, you say, 'no, we can get better," said Ellis. "We can get to zero, when everyone in an organization really gets it."

OGCA-supported programs COR, the League of Champions and the Safety Pass all continue to make strides, OGCA president Clive Thurston noted. There are more owner groups requiring COR certification all the time to qualify for work, membership in the League of Champions is growing and the Safety Pass is now making the jump outside of its contractor core to become adopted by diverse groups such as schools, architects and engineers.

"The OGCA created Safety Pass so that we can share a basic yet comprehensive orientation to any worker on any site because safety in our industry is important," explained OGCA health and safety committee chair Craig Lesurf of Walsh Canada. "Safety Pass has been a great success. Many stakeholders in construction see the benefits of having a minimum standard that everyone starts with before setting foot on a construction site."

The next step required for COR is formal adoption by the Ontario government, said Thurston. The OGCA needs to "push hard" to ensure the Ministry of Labour clears up "confusion" over whether COR or some other safety program will receive provincial accreditation, he said.

Martow was one of several speakers who stressed the importance of developing a safety culture, beyond health and safety programs, that drives behaviour.

"The rules are meant to give you safety guidelines, but it is up to every worker and supervisor to take a look and say, maybe I should take extra precautions," she said.

Kelusky reported the CPO's office was driving to develop safety solutions based on the lat-

est research and evidence. One focus has been on falls data in the province. The office looked at coroner's reports and found, "quite surprisingly," he said, that 15 per cent of fall injuries occurred in the first month of employment. And the majority of fall deaths occur to workers in their first four years of employment.

'We have the knowledge, it is the knowledge transfer we have to work on," said Kelusky.

Later, addressing overall safety messaging, the CPO said, "The biggest problem is we talk to the converted. We need to get the message out and Rob, you do a fabulous job of doing

Witmer praised the efforts of the OGCA in contributing to eliminate the WSIB's unfunded liability, an accomplishment announced earlier this fall. OGCA members "paid more than your fair share," she said.

The latter part of the event was devoted to presenting OGCA members with Jerseys of Courage, safety awards recognizing members with minimal lost time injuries (LTIs) and then Milestone awards, for firms with over 50,000 hours worked without an LTI. Milestone winners honoured included BDA Inc., Canadian Turner Construction, M. Sullivan & Son, Pomerleau, Al Langman Construction, Bestco Construction, Marant Construction and Ross & Anglin Ontario.

Specially honoured at the end of the morning for working over 10 million hours without an LTI was PCL Constructors Canada.

"It is really remarkable," commented PCL's senior vice-president and district manager Todd Craigen. "Ten million man-hours over a four-year period is a great accomplishment and I think it's a testament to our commitment to safety. At PCL we all believe we have an obligation to have a safe work environment.

"We take that commitment seriously and it is nice to be recognized by the OGCA here today."

OGCA safety committee chair Craig Lesurf presents a League of Champions jersey to MPP Gila Martow, parliamentary assistant to the minister of labour, at the OGCA safety breakfast on Oct. 26.

City of Hamilton smashes its own records in 2018 construction boom

DENA FEHIR

CORRESPONDENT

amilton is celebrating its biggest construction year in the city's history.

On Sept. 11, 2018, the City of Hamilton has, for the very first time, hit the billion dollar mark as early as September," said Hamilton chief building official Ed VanderWindt.

"We have also almost reached our all-time 12-month record of construction value of \$1,499,627,394 set by year's end 2012."

According to Glen Norton, City of Hamilton director of economic development, this represents the largest increase by percentage in the ICI (industrial, commercial, institutional) sector, which is up by 40 per cent or \$100 million over the previous three-year average.

Residential continues to be the largest sector by \$699 million for the year-to-date, which is 14.7 per cent or \$90 million over the previous three-year average.

"Basically, the city is firing on all cylinders," said Norton.

According to the Monthly Permit Report from the city's Planning and Economic Development Department's Building Division, there was a total of \$1.06 billion in building in the first nine months of 2018 compared to \$975.6 million over the same period last year.

For the month of September, the largest non-residential projects are the \$4.2 million and \$1.68 million for McMaster University; \$4 million for the City of Hamilton Woodward Wastewater Plant; \$2 million for a greenhouse on Safari Road; \$1.95 million for the public school board; and \$850,000 for a renovation of St. Joseph's Health Care.

Other recent major projects are a \$47 million apartment complex at 20 George St., \$26 million for Hamilton Health Sciences at 711 Concession St. and \$11 million for an elementary school on Lincoln Road in

Stoney Creek.

Notable numbers include: In the 12-month period ending September 2018, 8,350 building permits were issued, up from 8,301 from the same period in 2017.

Compared to the average of the last three-years of \$0.87 billion, construction activity in the first ninemonths of 2018 was up by 21 per cent.

In a summary of Hamilton construction from January to September for the indicated years, the totals are as follows:

- **2018** \$1.06 billion
- **2017** \$0.98 billion
- **2016** \$0.80 billion

Commenting on the numbers to date Vander-Windt said, "This milestone is a testament of how much our residents, businesses and the communities are invested in Hamilton. Further, it speaks to the outstanding work of our council and municipal staff in supporting the work of creating a healthy, safe and prosperous community."

Onsite, on the tools workers sought for survey

Continued from Pg. 1

'They are producing evidence-based academic research outside of influencing control of the construction sector," said

"It will be by far the most comprehensive study. I know they say 30 minutes is lengthy but we've taken the view that it needs to be academically sound.

"Just like you can't rush building a house or a condo or a road, a bridge, you have to do things properly, you have to follow the proper steps."

"The meat and potatoes of the people we're looking to get information from are the construction workers,"

Andrew Pariser RESCON

The survey will go beyond the residential sector and include the infrastructure trades that support it, Pariser noted, including earth moving, heavy construction, carpentry, site servicing, roads, sewers, watermains and utilities.

A governance committee was formed to help get the survey completed by workers. Job Talks is asking that the survey be circulated among Ontario construction industry employers, trainers and other relevant stakeholders.

'We have representatives from all the major trades in both residential and infrastructure. We've asked them to go to their members and reach out, we've also reached out to some of the unions to do the same," said Pariser.

"Our main focus is on construction workers and the easy way to define that is do you own a pair of safety boots and do you wear them on a regular basis? The focus is really onsite.

"We are looking for a limited number of health and safety people who are onsite and a limited number of management positions that support the onsite construction, but the meat and potatoes of the people we're looking to get information from are the construction workers that do the actual construction."

Pariser encouraged everybody to take part in the survey, stating labour supply is a concern now and its only going to grow in its magnitude.

"It's exciting to help shape the future of the industry but beyond that...when we recognize a challenge facing the industry, whatever it is, we have an obligation to do something about it," said Pariser.

Parallel to the survey, a video series is also being done.

"We started with a project on retention and we quickly figured out that as great as it is to have a study on how do you keep people happy and how do you keep people in the job, its hard to do that without looking at recruitment," Pariser said.

Jon Callegher, executive director of Job Talks, said the survey includes multiple choice and open-ended questions that were created with the help of focus groups and meetings with stakeholders

"This survey is different from anything that's been done — we get into their thoughts and their feelings about the trades and how they think other people see them," explained Callegher, adding the questions focus on career choice, personality, pros and cons and the future of the industry.

"The questions are around understanding construction workers in regard to how they feel about the work and how happy they are in their jobs and to help to identify those who are not in the trades see what things they might have in common with people who do work in the construction industry."

The survey can be accessed at http://f. canview.com/6036/.

China building boom uncovers buried dinosaurs for paleontologists

At the end of a street of newly built highrises in the northern Chinese city of Yanji stands an exposed cliff face, where paleontologists scrape away 100-million-year-old rock in search of prehistoric bones.

Like many fossil excavation sites in China, this one was discovered by accident.

China's rapid city building has churned up a motherlode of dinosaur fossils.

While bulldozers have unearthed prehistoric sites in many countries, the scale and speed of China's urbanization is unprecedented, according to the United Nations Development Program.

Perhaps no one has seized the scientific opportunity more than Xu Xing, a diligent and unassuming standardbearer for China's new prominence in paleontology.

The energetic researcher has named more dinosaur species than any living paleontologist, racing between dig sites to collect specimens and further scientists' understanding of how birds evolved from dinosaurs.

Matthew Lamanna, a curator at the Carnegie Museum of Natural History in Pittsburgh, said Xu is "widely regarded as one of the foremost, if not the foremost, dinosaur paleontologist working in China today."

"Xu Xing is A-M-A-Z-I-N-G," Kristina Curry Rogers, a paleontologist at Macalester College in St. Paul, Minnesota, wrote in an email.

Two years ago, Xu's colleague at the Chinese Academy of Sciences in Beijing, Jin Changzhu, was visiting family in Yanji when he heard talk of fossils uncovered at a construction site.

A preliminary inspection yielded what appeared to be a dinosaur shoulder bone.

"This is a major feature of paleontology here in China — lots of construction really helps the scientists to find new fossils,"

Chinese Academy of Sciences

Less than an hour's drive from the North Korean border, the midsize city has been erecting residential blocks quickly. Seen from a plane, Yanji looks like a Legoland of new pink- and blue-roofed buildings, but there's one long empty lot of exposed rocky hillside — the excavation site.

When Xu arrived at Yanji, he recognized the site could fill gaps in the fossil record, noting the relative paucity of bones recovered from the late Cretaceous period, which was around 100 million years ago.

An analysis of the layers of volcanic ash revealed the site's

age. Xu is now overseeing a team of scientists using picks, chisels and steel needles to study the exposed hillside, where geologic layers resemble a red and grey layer-cake.

The site has yielded partial skeletons of three ancient crocodiles and one sauropod, the giant plant-eating dinosaurs that included some of the world's largest land animals.

"This is a major feature of paleontology here in China lots of construction really helps the scientists to find new fossils," said Xu as he used a needle to remove debris from a partially exposed crocodile skull.

Born in 1969 in China's western Xinjiang region, Xu did not choose to study dinosaurs.

Like most university students of his era, he was assigned

His love for the field grew in graduate school in the 1990s, as feathered dinosaurs recovered from ancient Chinese lakebeds drew global attention.

When Xu and Jin discovered fossils in Yanji in 2016, city authorities halted construction on adjacent highrise buildings, in accordance with a national law.

"The developer was really not happy with me," said Xu, but the local government has since embraced its newfound claim to fame.

The city is now facilitating Xu's work, and even built an onsite police station to guard the fossils from theft.

Once the excavation is complete, a museum is planned, to display recovered fossils and photos of Xu's team at work.

It's not the first museum to commemorate Xu, whose prodigious fieldwork has taken him across China and resulted in a flurry of articles in top scientific journals.

Toru Sekiyu, a paleontologist from the Fukui Prefectural Dinosaur Museum in Japan who assisted on the Yanji dig, called his Chinese colleague "a superstar paleontolo-

But Xu is quick to point out the role that good fortune has played in his career.

"To publish papers and discover new species, you need new data — you need new fossils," he said, adding that finding new species isn't something a scientist can plan.

"My experience tells me that you really need luck, besides your hard work. Then you can make some important discoveries."

With digs in Inner Mongolia, Liaoning, Yunnan and other Chinese provinces, Xu patiently oversees excavations, sometimes chiseling for years before he knows their ultimate significance.

While his finds are wide-ranging, much of his career has focused on understanding how dinosaurs evolved into

China is an ideal location for that study.

Two decades ago, rare dinosaur fossils that preserved traces of feathers were found in ancient lakebeds of north-

This discovery, which helped scientists demonstrate that birds descended from dinosaurs, was possible because the mixture of volcanic ash and fine-grained shale in the lakebeds had preserved bits of soft tissue, including feathers — unlike the majority of dinosaur fossils, which contain only bone.

Since then, a flood of new dinosaur bones unearthed in China has helped scientists rewrite their understanding of the tree of life in various ways.

Xu has been at the forefront of research into how dinosaurs evolved feathers and flight.

In 2000, he described a curious pigeon-sized dinosaur with four feathered limbs, apparently early wings that allowed the animal to either fly or glide.

In 2012, he detailed a carnivorous tyrannosaur, which also had plumage — raising questions about feathers' original purpose.

Xu now believes that early dinosaur plumage may have played a role in insulation and in mating displays, even before flight feathers evolved.

He co-authored a 2010 paper that examined fossilized melanosomes — pigment packets that give rise to colour in modern bird feathers — to deduce the likely colours of dinosaur feathers.

Some species likely sported rings of white and brown tail feathers; others had bright red plumage on their heads.

Embracing new technology, his team also uses CT scanners to study the interior of fossils and builds 3-D computer simulations to make inferences about what range of motions a dinosaur may have had.

One of the fossils Xu is now examining, found at a construction site in Jiangxi province, will shed light on how modern birds' reproductive systems evolved from dinosaurs, he says.

Matrix Labour Leasing is on a crusade to professionalize labour services

MATRIX LABOUR LEASING

he construction industry has a significant labour supply problem and it's likely to get worse. BuildForce Canada predicts that almost 250,000 construction workers are planning to retire over the next decade. Matrix Labour Leasing, a Calgary-based provider of skilled tradespeople and labourers, is working to help fill that employment gap by efficiently supplying construction workers to contractors who need them, while recognizing the value and aspirations of its workers. Better still, Matrix on-boards all responsibilities for workers' compensation, training, hiring, and relational responsibilities.

The temporary labour supply agencies that have historically supplied workers to the construction industry were working on an outdated business model," says Shannon Warren, CEO and founder of Matrix. "The nature of those businesses created an environment where transient workers filled temporary positions and the employer was often left to ensure that the worker was actually qualified for the job and properly trained and certified. Temporary labour also wasn't fulfilling for workers who couldn't build careers or develop financial security while working for a short-term employer with whom they had never developed a relationship."

Warren saw this first hand as a framing worker in the residential sector, working in the Vancouver area, where he personally experienced the negative effects of irregular workflow, tumultuous management practices and sporadic income, which not only hindered the quality of work completed, but also affected worker retention and wellbeing.

Warren founded Matrix in 2002 to develop an ecosystem that not only eliminated the pain points of labour acquisition for employers, but also created stability and growth opportunities for workers. Instead of simply locating workers to fill positions, Matrix Labour Leasing is a full-service human resources agency specializing in the placement and administration of the skilled trades workforce across Canada.

"With Matrix, our clients sign the contract with us, not the kers we provide," he says. "Whether the work is hourly, short term, long term, permanent, or temporary to permanent, the employee's home is always here."

The Matrix formula begins with the establishment of a skilled and motivated workforce.

'The first thing I learned as a construction worker was what not to do as a leader," Warren says. "As worker, my fluctuating income made it difficult for me to achieve financial stability and dealing with disorganized management structures severely impacted my ability to deliver quality work. It wasn't just me. I saw the effect that this precarious environment had on staff retention across the construction industry, as well as the impact it had on the quality of work of others. I was inspired to create an employee-centric labour supply company that always put people first and was built on the simple truth that contented staff do better work and create happier clients."

Matrix provides the building blocks for success by assembling its own skilled workforce, and leveraging technology to find the best workers offering the appropriate skills and safety training required by employers. Over the course of 16 years, the company has built a huge database of craft labour. It then provides administrative services through a proprietary HR community, allowing employers to concentrate on what they do best.

"We invest in our workforce through training, benefits and

RRSPs," says Warren. "We guarantee a pay cheque to each worker, even if we are unable to collect payment for their work. We concentrate on employee retention and loyalty. We offer competitive wages and that's evident in our bottom line-84 per cent of our costs are attributed to wages and benefits. Currently 97 per cent of

Workers receive mandatory safety training. All workers are Construction Safety Training System (CSTS) certified. Three-quarters possess fall protection training tickets and 40 per cent possess first aid tickets

Labour Connect also efficiently collects information on safety tickets and certifications. Workers are frequently text-messaged to ensure that all information is current.

Warren notes that the construction industry has often fallen behind the high-tech curve. That's why Matrix developed Labour Connect, an online platform to connect employers and workers in an online product that combines best practices from Indeed, LinkedIn and other popular online job sites. Using the platform, Matrix can quickly provide labour services to its clientele, while ensuring that each worker offers the most suitable profile, skills and training for each available position.

We've built a social media platform that not only connects workers to employers, but also connects people to other people," he says. "We offer a number of social features, such as the ability to comment on job postings and to send messages to other people. However, the most important feature is that Labour Connect makes it easy for the 10,000 workers listed with the platform to see the job postings that are best suited to each person, and lets them apply with the click of a button. This makes the application process simple and intuitive. The streamlining process makes it much easier for employees to apply for jobs that suit them, and also easier for employers to screen for the most qualified applicants. Using this platform, placements take days instead of weeks and the cost of on-boarding is significantly reduced."

The company's extended social network reach is immense, connecting with more than 8,000 workers on the Matrix Facebook page, more than 29,000 on the Labour Connect Facebook page and more than 10,000 on its MailChimp account.

'With with a few clicks we can reach more than 60,000 people in the industry to fill positions quickly with the right candidate for

Matrix has received recognition not only from its clients and worker family, but from outside the industry as well. The company has been recognized as one of Alberta Venture's Fast Growth 50, as a Leader of Tomorrow by Business in Calgary magazine and as one of Canada's fastest-growing companies by five-year revenue growth on the PROFIT 500, published by Profit magazine. To date, Matrix has generated more than four million hours of employment in fields that include industrial construction, commercial construction, maintenance outages and shutdowns, oil and gas, manufacturing, warehousing, health care and the cannabis industry. The company now retains the services of more than 1,200 skilled employees.

'By creating an employee team, we're far more than a collection of workers we represent at any given time," says Warren. "We're a family that's building a trusted brand for exceptional clients."

THE ASSOCIATED PRESS

THE FUTURE OF SKILLED TRADES STAFFING, TODAY.

Matrix Labour Leasing is an industry leader in full-service skilled trades placement. Our mandate is to consistently deliver accurate, cost-effective, and best-in-class labour supply solutions to our construction and oil and gas clients across Canada. For the past 15 years we have been

successfully attracting and employing the best available talent by extensively investing in technology, process and retention methodologies. If you need a company that offers fast turnaround; reliable, responsive service; and robust, cutting-edge offerings, then you need Matrix.

REASONS TO CHOOSE MATRIX FOR YOUR STAFFING NEEDS...

We're Experienced

15 years in business, over \$100 million in sales. Recognized by Fast Growth 50, Profit 500 and Leaders of Tomorrow.

We're "People" Centric

We invest in our people through competitive wages, benefits, RRSPs, education and training.

We Focus on Safety

Best-in-class training and safety initiatives ensure that our team has the skills to exceed our client's needs and expectations.

We Invest in Tech

We are a pioneer in the development and utilization of social recruitment and community building to drive quick, accurate placement.

We believe that by taking care of the important details, the big picture takes care of itself.

In our world, those "details" are how we treat, train, and motivate our employees,
and the "big picture" is our level of client satisfaction.

Consult: Bousfields Inc, Peter Smith, 3 Church St, Toronto ON M5E 1M2 416-947-9744 Fax: 416-947-0781

Construction of a 50-storey condominium building with 461 residential units. Residential amenity spaces are proposed on the 7th and 8th floors, directly above the office component of approx 69,217 sq ft (levels 2 through 6). These two full floors of amenities include a mix of indoor spaces and outdoor podium-top terraces totaling 1,844 m, or 19,849 ft. Level 7 would include 763 m of indoor amenity space and 260 m of outdoor space, while level 8 would include 661 m of indoor amenities and an additional 131 m of outdoor space. The building's six-storey podium, and the mechanical penthouse levels, would sport decorative metal louvers with a copper-hued finish, helping to distinguish the tower's base and its place on the local skyline. Local Planning Appeal Tribunal approvals are in place for this revised scope of work. Project was forwarded to the city of Toronto Design Review Panel; municipal site plan approvals are forthcoming. Working drawings are underway. Schedules for invited sub trade tenders and construction are anticipated spring, 2019.

Construction start 04-Mar-19; Completion by 04-May-21;

CM: State Building Group, John Guanti, 2700 Dufferin, York ON M6B 4J3 416-787-0256

Construction of four apartment buildings in two parcels. The scope of work calls for three towers with heights of 26, 57, and 59 storeys, a combined 1,937 condominium units, and 3,597 m of retail across the site. The two taller towers on Wellington would rise from a shared podium of 2 and 8-storey volumes. Between the southwest and northeast portion of the property, a 1,608 m parkland dedication has been introduced as has a two-storey amenity building. Preliminary designs are underway. Project has been forwarded to the Local Planning Appeal Tribunal (LPAT); a hearing was held mid-June 2018. A decision at the OMB is pending. Scope of work is subject to change pending LPAT approvals. Invited sub trade tender and construction schedules will be finalized pending approvals and eventual sales. Further update late 2018 / early 2019.

How to use the Building Reports

The Building Reports section of Daily Commercial News includes Prebid, Out for Tender, Bid Results and Start reports. Projects located throughout Ontario are reported.

Pre-Bid

The Daily Commercial News Pre-Bid section includes reports on projects planned for future construction — from the "Conceptual" stage (prior to architect selection) through architect selection, design, final planning and preconstruction-negotiated, updated as significant changes occur. Select jobs to follow, contact the owner or architect.

Out for Tender

The Daily Commercial News Out for Tender section includes reports on projects currently being tendered, the initial list of bidders, bid date changes. Pick jobs in your area of interest.

Bid Results

The Daily Commercial News Bid Results section includes reports on projects announcing results after the receipt of tenders. Reports include the names and bid prices of low bidders, and the name of the successful contractor.

Starts

The Daily Commercial News Starts section includes reports from building permits. Look for jobs you have been following or new jobs in your area of interest.

Regions included:

Central Ontario

Includes census divisions of Durham, York, Toronto, Peel, Halton, Dufferin, and Simcoe

Eastern Ontario

Includes census divisions of Northumberland, Prince Edward, Dundas-Stormont-Glengarry, Prescott-Russell, Lanark, Leeds-Grenville, Frontenac, Lennox-Addington, Hastings, Peterborough, Kawartha Lakes, Haliburton, Renfrew, Muskoka, Nipissing, Parry Sound, and Ottawa

Western Ontario

Includes census divisions of Niagara, Hamilton, Waterloo, Haldimand-Norfolk, Brant, Oxford, Perth, Elgin, Chatham-Kent, Essex, Lambton, Middlesex, Huron, Grey-Bruce, and Wellington

Northern Ontario

Includes census divisions of Kenora, Rainy River, Thunder Bay, Cochrane, Algoma, Sudbury, Timiskaming, and Manitoulin

YORK WOODS LIBRARY AND THEATRE **RENOVATIONS** ID: 4030753 **\$6,200,000 est NORTH YORK, Toronto, ON**

1785 Finch Ave. W, North York, M3N 1M6

Owner: Toronto Public Library, Gary Penak, 789 Yonge St., Toronto ON M4W 2G8 416-395-5615 Fax: 416-393-7229

Con Admin: Toronto Public Library, Scott Smith, 789 Yonge St., Toronto ON M4W 2G8 416-393-7243 Fax: 416-393-7229

Architect: Diamond Schmitt Architects, 384 Adelaide St, Toronto ON M5V 1R7 416-862-8800 Fax: 416-

Renovations to the York Woods Library and Theatre. The project will address current and evolving technological requirements for connectivity and include innovative spaces for technology-based services, computer learning and collaboration. At YW, this will include a multi-room digital innovation and creation space, as well as an enhanced computer learning centre. Areas to promote and merchandize library collections, and options for interesting seating, study and lounge areas should also be included. The renovation will also include the following state of good repair building issues: Replace all remaining roofing that was not replaced in 2013, when roof areas D to H were replaced, which includes approximately 10,000 square feet of built-up roofing and 150 square feet of metal roofing; in addition, the skylight on roof area A will be replaced; Replace all existing windows in the library that were installed circa 1970; Theatre upgrades to bring the existing theatre up to present day standards; All new, energy efficient, heating, ventilating and air conditioning (HVAC) and humidification equipment. replacing all existing HVAC equipment. Some of the current equipment was installed in 1970 when YW opened and some was installed in 1995, when the theatre was expanded. Reuse existing duct work and piping that is suitable for the new equipment; A new Building Automation System (BAS) to control the new HVAC equipment, compatible with the Library's Niagara Tridium BAS; All plumbing distribution piping throughout the building and all new water efficient plumbing fixtures; All new electrical systems, starting with new service entrance equipment and all electrical distribution panels and wiring throughout the building; A new fire alarm system; All new energy efficient LED lighting and smart building controls; All new voice, data and Wi-Fi cabling and raceways; All new cabling and raceways for the existing Keyscan access control system; All new cabling and raceways for the new BAS; All new cabling and raceways for an interior and exterior security camera system; and A new public address system, including speakers, amplifier/microphone, cabling and raceways. Preliminary design is ongoing; working drawings are expected

early 2019. Tenders for the project are expected to be phased. Tender for mechanical contractors will be issued spring/summer 2019. Tender for general contractor for structural works is anticipated fall 2019. Construction schedules will be finalized late 2019/early 2020. *A contact at the architect is

not released for publication.

RFP ARCHITECTURAL SERVICES -CENTENNIAL PUBLIC LIBRARY ID: 4168303 \$8,954,000 est

NORTH YORK, Toronto, ON

578 Finch Avenue West, North York, M2R 1N7 CONCEPTUAL

Owner: Toronto Public Library, Gary Penak, 789 Yonge St., Toronto ON M4W 2G8 416-395-5615 Fax: 416-

The Library intents to demolish the existing Centennial Library and reconstruct a new single-storey library of approximately 15,000 square feet. The reconstruction project will create all public service areas in order to modernize and make accessible all areas of the new branch. It will also create zoned areas for adults, teens and children; flexible meeting, study and collaboration spaces; efficient staff workspaces, self-service and improved customer self-service areas. The project will address current and evolving technological requirements for connectivity and include collaborative spaces for learning and study. At Centennial Library, this will include versatile programming space, access to desktop computers and Wi-Fi and a mini tech hub that provides access to equipment and software that can be set up and taken down in different locations, both within the library and the community. Areas to promote and merchandize library collections, and options for interesting seating, study and lounge areas should also be included. The owner has issued a Request For Proposals from consulting services to complete design. The Preferred Proponent will be provided with a library building program scope from the Library. The Preferred Proponent will be required to: Participate in a full public consultation process; Attend, chair and record all design meetings, providing agendas prior to and minutes from the meetings; and Practice value engineering/life cycle costing throughout the design process, in order to provide a cost effective design. The awarded proponent will provide design, working drawings and construction administration.

An award is expected early 2019. REQUEST FOR PROPOSAL - RFP - DESIGN SERVICES DUE: at 11:00 AM ET. 20-Nov-18

REHABILITATION OF 3 BRIDGES ON COUNTY ROAD 17 ID: 4446292 \$1,000,000 est

SEVERN, Simcoe, ON Co. Rd. 17. Severn. L3V 0V1

CONCEPTUAL

Owner: County of Simcoe, 1110 Hwy 26 Midhurst, Midhurst ON LOL 1X0 705-726-9300 Fax: 705-

The County of Simcoe is proposing to rehabilitate three (3) reinforced concrete rigid frame bridges located on County Road 17, in the Township of Severn. Upper Big Chute Road Bridge (Structure No. 017048) and Dunford Bridge (Structure No. 017052) measures 14.75m in span length and the Lovering Bridge (Structure No. 017058) measures 17.45m in span length. The County of Simcoe is seeking consulting engineering services from selected consultants to review and interpret previous detailed deck condition survey results, visually inspect the structure, review and assess potential rehabilitation options, obtain all necessary permits and approvals, carry out a topographic survey, prepare a Preliminary Design Report, and prepare a contract specification and drawings for the construction. Construction for all three bridges is scheduled for 2020; proponents are to assume one (1) construction tender for all three (3) bridges. The study area will extend 500m on both approaches to provide sufficient roadway to reconstruct the approaches to the structure. Necessary improvements to the roadway within the study area shall be deemed to be included in the scope of work. Questions: 2018-Nov-13 16:00 EST The method of contractor selection has not been determined at this time.

REQUEST FOR PROPOSAL - RFP - DESIGN SERVICES DUE: at 2:00 PM ET. 16-Nov-18

Construction start 16-May-19; This report November 5, 2018.

Consult: GHD, 11 Allstate Parkway Ste 310, Markham ON L3R 9T8 905-752-4300 Fax: 905-752-4301 The Work includes but is not limited to the following:

1. Project startup including mobilization to the Site. Development, implementation, and maintenance of a Site specific Health and Safety Plan. 2. Provision and maintenance of temporary facilities and controls required to execute the work. 3. Compressor Building: a. Replacement of glycol heating system at south end mechanical room, b. Installation of new glycol piping from the north end of the compressor building to the WGB building. c. Install new 50mm WGB pilot line natural gas supply header from the natural gas header on the east exterior wall of the gas compressor building to the WGB building. New pilot line shall be surface routed as shown on drawings. Disconnect and abandon the existing buried WGB pilot line natural gas piping at the natural gas header at the east exterior wall of the compressor building. The existing pilot line shall remain active until the third and final flare is isolated for removal. d. Installation of an oil water separator on a new platform in the compressor building basement connected to the ground level floor drains. Waste oil from the separator shall be sent to the waste oil tank on the main floor and water from the separator shall be sent to the nearby sump pit. 4. WGB Building: a. Sequential replacement of each WGB system including supporting mechanical and controls systems while maintaining two operational WGBs at all time. b. Demolition and removal of existing WGBs including WGB controls and associated support systems and metal framed caged enclosures at each flare base, c. Replacement of quardrail and lighting fixtures on the WGB building roof, d. Concrete repairs to the roof slab of the WGB building. e. Replacement of WGB concrete housekeeping pads. f. Placement of concrete topping on the entire exposed roof of the WGB building. g. Enclosing of the WGB building including, but not limited to, the addition of masonry infill walls, windows, doors, wall liner, heating and ventilation systems. h. Replacement of the WGB building access ramp, walkways and fencing around the building. i. Installation of Building Automation System (BAS) with integration to plant SCADA. j. Integration of the WGB operations and controls to emergency power fed by existing UPS including the installation of a new feeder from

the Head House black start generator to the UPS in the digester electrical room and installation of an automatic transfer switch. k. Replacement of main WGB digester gas and sour gas supply piping, isolation valves, flame arresters, pressure regulators and appurtenances. I. Upgrades of the WGB system to satisfy TSSA based on latest Code for Digester Gas and Landfill Gas Installations - CSA B149.6-15. m. Testing, training and commissioning of the new/ upgraded WGBs operational and control systems. 5. Site Work: a. Installation of a pre-fabricated building for housing new WGB control panels, and electrical systems including installation of a foundation. b. Installation of a new electrical duct bank and manhole from the digester 7 & 8 sludge gallery to the WGB building. c. Installation of cable tray and pipe supports with concrete foundation from the WGB control building to the existing gas compressor building. d. Installation of new retaining walls, concrete walkways, curbs, site grading and restoration. 6. CONTRACTOR shall remove items as identified in the Contract Documents for removal or demolition, and CITY shall retain the first right of refusal on all equipment to be removed and/or demolished. 7. Testing of WGBs prior to return to service. In accordance with TSSA and CSA B149.6-15, CONTRACTOR shall include TSSA inspection and test witnessing fees. 8. Comply with requirements for provisional items in accordance with Section 5A Specific Conditions of Contract 9 Other miscellaneous works as outlined in the Contract Documents. 10. Demobilization and closeout. More information can be obtained at: https://tinyurl.com/ yc3ogo2a Owner does not track plan takers and/or interested bidders. The Works proposed under this project include renovations to an existing building at 145 Harry Walker Parkway North in the Town of Newmarket The property located at 145 Harry Walker Parkway North is managed and owned by the Region. The building includes an existing office and warehouse facility. The Region needs to expand its existing office space by converting approx. 6,000 sq. ft of existing warehouse space into the office space. The design and specifications of the new office space will match the existing office space, which was recently renovated in 2016. The proposed renovation includes but is not limited to structural, mechanical and electrical works. Documents and addenda may be obtained at: https://york.bidsandtenders.ca

Repro: Merx, 6 Antares Dr, Nepean ON K2E 8A9 800-964-6379 Fax: 888-235-5800

Improved access to the central water supply system in the Barrhaven South and Manotick areas. This is to be achieved via the proposed Manotick Watermain Link (MWL) and the North Island Link (NIL). Phase 1 of the MWL involves a 610 millimetres diameter watermain along River Road, from the Riverside South Community to a crossing of the Rideau River at Walter Upton-Collins Park to David Bartlett Park on Long Island. The NIL will connect the south end of the Phase 1 MWL at the park to the existing watermain on Rideau Valley Drive at Barnsdale Road. Consulting engineer firms have been shortlisted for the request for pre-qualification to carry out preliminary design, detailed design, and tender documents. Invited request for proposal for engineering services has closed and submissions are under review. The proposed period of contract for design services is from the date of award to December 31, 2019. Further design, tender and construction timelines may be determined early, 2019 upon award.

Mech Eng: Chiarelli Engineering, Nancy Davis, 203-100 Craig Henry Dr., Nepean ON K2G 5W3 613-

225-1123 Fax: 613-225-7298 The project centres around the upgrading the Heating and Ventilation systems serving St. Martin de Porres Church located at 3891 Old Richmond Road in Ottawa, ON. The heating boiler supplying perimeter heat to the Church and the Air Handling Units (AHUs) serving the Basement and Hall and the ground floor Sanctuary have past their life expectancy and are in of replacement. The boiler will be replaced by two (2) high efficiency condensing type natural gas fired boilers. The existing air handling units serving the Hall and the Sanctuary will be demolished and removed from the site. New gas-fired exterior Air Handling Units will be located in the courtyard on the west side of the Church. The new AHUs will be mounted on a steel structure which will also be on a slab-on-grade concrete pad. The total square footage for this project is approximately 325 square feet for the Boiler Room and approximately 380 square feet for the exterior mounted AHUs.

Repro: Merx, 6 Antares Dr, Nepean ON K2E 8A9 800-964-6379 Fax: 888-235-5800

The work includes, but is not necessarily limited to, the supply of labour, material, supervision and equipment necessary for the renovation of 6 RHUs of various styles. Work for this project comprises the renovation of one (1) "V" Style, one (2) "KK54/C" Style and three (3) "JJ" Style, two-story residential housing units located at CFB Kingston, Ontario. The existing units were built in the early 1950s and are being reconfigured to be brought up to contemporary standards. The V unit is approximately 1716 sq. feet in area with four (4) bedrooms and one (1) full washroom. The KK54/C units are approximately 1350 sq. feet in area with four (4) bedrooms and one (1) full washroom. The JJ units are approximately 1104 sq. feet in area with three (3) bedrooms and one (1) full washroom. All units will require the removal of drywall, vermiculite, lead paint, and asbestos flooring as hazardous materials. Hazardous materials including lead paint, asbestos, silica, PCBs and mercury are to be abated following Provincial/Federal Regulations. The renovations will include, but are not limited to, the removal of all interior finishes back to studs and subfloor, reconfiguration of interior layouts, new insulation, new interior finishes, new kitchen, new first and second floor bathrooms, new hardwood flooring, ceramic floor tile, new concrete slab in crawl space with new sewer lateral & drain (V style only) and new plumbing, heating, A/C and electrical throughout. Work also includes replacement of some windows and doors. Exterior work is involved in closing or modifying doorways and some window locations, it also requires removal of chimneys as well as some canopies and stoops and installation of new composite material decks off the back of all units.

Construction start 20-Dec-18; Completion by 02-Jul-

The work includes, but is not necessarily limited to, the supply of labour, material, supervision and equipment necessary for the renovation of 6 RHUs of various styles. Work for this project comprises the renovation of one (1) V Style, one (2) KK54/C Style and three (3) JJ Style, two-story residential housing units located at CFB Kingston, Ontario. The existing units were built in the early 1950s and are being reconfigured to be brought up to contemporary standards. The V unit is approximately 1716 sq. feet in area with four (4) bedrooms and one (1) full washroom. The KK54/C units are approximately 1350 sq. feet in area with four (4) bedrooms and one (1) full washroom. The JJ units are approximately 1104 sq. feet in area with three (3) bedrooms and one (1) full washroom. All units will require the removal of drywall, vermiculite, lead paint, and asbestos flooring as hazardous materials. Hazardous materials including lead paint, asbestos, silica, PCBs and mercury are to be abated following Provincial/Federal Regulations. The renovations will include, but are not limited to, the removal of all interior finishes back to stude and subfloor, reconfiguration of interior layouts, new insulation, new interior finishes, new kitchen, new first and second floor bathrooms, new hardwood flooring, ceramic floor tile, new concrete slab in crawl space with new sewer lateral & drain (V style only) and new plumbing, heating, A/C and electrical throughout. Work also includes replacement of some windows and doors. Exterior work is involved in closing or modifying doorways and some window locations, it also requires removal of chimnevs as well as some canopies and stoops and installation of new composite material decks off the back of all units

OUT FOR TENDER

Engineering

PROPOSAL - PEDESTRIAN BRIDGE ACROSS THE RIDEAU RIVER BETWEEN THE **COMBINED AND DETACHED LOCKS ON** THE RIDEAU CANAL SYSTEM ID: 4447800 \$1,000,000 est

SMITHS FALLS, Lanark, ON

To Be Announced, Smiths Falls, K7A 1B1

TENDERS DUE, 18-Dec-18 at 11:00 AM ET. Solicitation #: 18-CS-08

Owner: Town of Smiths Falls, 77 Beckwith St N, Smiths Falls ON K7A 4T6 613-283-4124 Fax: 613-

Con Admin: Town of Smiths Falls, Art Manhire, 77 Beckwith St N, Smiths Falls ON K7A 4T6 613-283-4124 x6101 Fax: 613-283-4764

For the provision of a pedestrian bridge(s) spanning the Rideau River between the Combined and Detached locks for Parks Canada on the Rideau Canal system. Provide a plan, design, cost and timeline for the provision and installation of a pedestrian linkage across the Rideau River (possibly adjacent to the Water Treatment Plant on Abbott Street) in the basin between the Combined and Detached locks for Parks Canada on the Rideau Canal system. A map of the area with water elevations is included in the appendix below. Basic requirements for the licencing authorities of Parks Canada and the Rideau Valley Conservation Authority (RVCA) indicate that any structure crossing the river must be above 121.5M elevation to ensure that structures are not exposed to high water. This level has been provided by the RVCA as an indication of the 100-year flood mark. Structures should be pleasing to the eye and fit with the surrounding area. The structure should also enhance the beauty of the waterfront and the Victoria Park basin. Along with measurements, design, cost and installation dates for the project proponents will provide a rendering or mock-up of the proposed design to aid in the selection of the winning design. It is the goal of the Corporation of the Town of Smiths Falls to have a structure in place in the Spring of 2019 following the Spring freshet

as water levels and environment allow. Construction start 18-Jan-19;

Civ Eng: Correctional Service of Canada, Chris Barkley, 443 Union St. W, Kingston ON K7L 4Y8 613-545-8274 Fax: 613-536-4571

The Correctional Service of Canada (CSC) is taking steps to minimize safety concerns with foot traffic entering and exiting GVT01 and GVT02 within the Grand Valley Institution compound. Replacement of the existing steps and ramps is required to minimize concerns by providing a safe, non slip, hard surface that can be cleared from snow and ice conditions during the winter months and that conforms with barrier free requirements. The existing ramp/stairway was built as a temporary structure for these trailers and as such has reached its end of life. Further to that it was also not built to conform with barrier free standards. As these trailers continue to be required at grand valley institution for program space, office space etc. the ramps require replacement. Currently on trailer cannot be occupied as a result of the condition of the existing structure. The contractor is to provide all personnel, tools, services, supplies, materials, supervision, applicable travel, meals, accommodations and equipment to: - Supply and install a new modular aluminum ramping system for both trailers which incorporates stairs. - Walking surfaces shall be constructed with an open mesh style surface - Walkways and stairways to be a minimum of 5' wide - All walkways to provide handrails - Ramp/stairs must be designed to provide egress from the front door of the building and shall direct traffic in the same direction as the existing ramps. - All required excavation, grading and stabilization to be provided by contractor. - Rise of ramps much provide access the complies with barrier free requirements. - Minimum of 5 year warranty must be provided for aluminum products. - Demolition and Removal of existing stairs and ramps from the Institution to be completed by the institution. Documents and addenda can be obtained from https://buyandsell. gc.ca/procurement-data/tenders The bid list for this project may be incomplete. If you have been

WS Morgan Construction Ltd, 19 Bowes St, Parry Sound ON P2A 2K7 705-746-9686 Fax: 705-746-7264 The Bidders' Register is a daily list of jobs out for tender, including lists of firms that have taken out plans. We do our utmost to ensure accuracy and completeness of these lists, but the official lists are the property and responsibility of the authority issuing plans and specifications. Jobs and firms are listed here without obligation or cost.

To have your firm included, or to obtain a list of bidders, call the Research Team Inquiry Desk: 1-800-387-0213.

Did You Know...?

Your Daily Commercial News subscription also gives you access to CMD Leads online. CMD Leads provides you with all projects out for tender, including those where a list of plans holders is available. Access CMD Leads with the user name and password you were provided — if you have misplaced this please contact Customer Care at 1-800-959-0502 or email customerrelationscanada@constructconnect.com.

Certificates and Notices

NOTICE: Effective July 1, 2018, amendments to the Construction Act are reflected in the Certificates and Notices section of Daily Commercial News. These amendments required minor changes to the forms for Certificate of Substantial Performance (now called Form 9), Certificate of Completion of Subcontract (now called Form 10), and Notice of Intention to Register a Condominium (now called Form 11). The amendments also required publishing of two new notices: Notice of Non-Payment of Holdback using Form 6, and Notice of Termination using Form 8. To learn more about the amendments, visit www.dcnonl.com/ construction-act.

Visit www.dcnonl.com/submit-manual to download Forms 6, 8, 9, 10 and 11.

To publish certificates and notices, email dcncertificates@constructconnect.com or fax 1-800-947-7966. For more information call 905-752-5482.

26TH ANNUAL CCPPP CONFERENCE ON P3

Conference agenda unites innovation with infrastructure needs

Mark Romoff
President & CEO, CCPPP

"The cities, the countries that excel in the coming decades will be those that see opportunity in the confusion and stretch their dollar for maximum benefit."

MARK ROMOFF
President & CEO, CCPPP

Welcome to the 26th Annual CCPPP Conference on Public-Private Partnerships. We have an exciting two days ahead, where you'll hear from key infrastructure leaders from across Canada and abroad, as well as enjoy unparalleled networking opportunities.

It's clear in this time of great disruption — from rapidly changing technology to an increasing number of extreme weather events — that new approaches are needed that marry our innovation and infrastructure agendas together.

The cities, the countries that excel in the coming decades will be those that see opportunity in the confusion and stretch their dollar for maximum benefit.

All of these changes, as you know, are having a tremendous impact on how we think about and deliver much-needed infrastructure to provinces, territories, municipalities and Indigenous communities.

At P3 2018, we'll tackle some of the biggest challenges confronting the P3 sector. We'll hear from leaders about the struggles they're encountering and how they're adapting and innovating to succeed. Conversations will be topical and provocative.

Leonard Brody, an award-winning Canadian entrepreneur, venture capitalist, bestselling author and a two-time Emmy nominated media visionary, will give us the lowdown on what all this global tech disruption means for the sector in his talk entitled The Great Rewrite – Infrastructure.

Puerto Rico Gov. Ricardo Rosselló, who knows firsthand the devastating impact extreme weather events like Hurricane Maria can have on human life and critical infrastructure, will talk about how his government is working closely with the private sector to rebuild the U.S. territory quickly and with innovative infrastructure designed to weather storms more successfully in the future. P3s are part of these efforts, including a request for qualifications issued in September to help rebuild damaged marine terminals.

Joseph Mancinelli, international vice-president and central and eastern Canada regional manager of the Labourers' International Union of North America (LIUNA), will discuss his visionary idea to have the SEE DISCUSSIONS PAGE 6

Toronto aligned to grow as global hub for P3 transactions

ANGELA GISMONDI

Staff Writer

new report from the Toronto Financial Services Alliance (TFSA) in collaboration with KPMG Canada indicates that Toronto is a leading international hub for public-private partnerships (P3s) and has the potential to grow further as the adoption of the P3 model continues to increase.

A survey and the subsequent report, Knowing When to Partner, ranks Toronto's financial services sector number one in North America and third globally behind New York and London, in terms of ability to provide expertise and funding to deliver P3s stating it is uniquely positioned to help governments across the globe leverage P3s. It also states the city can help government authorities address the growing infrastructure gap in Canada while benefiting Toronto's financial services sector and Canadian taxpayers.

"Opportunities that will likely enhance Toronto's position as an international P3 hub include the government is locating the Canada Infrastructure Bank in Toronto; Newfoundland, Nova Scotia and Manitoba have embarked on a new wave of P3 activity; P3s are an effective way to close the First Nations infrastructure gap; and the United States may be on the cusp of a significant infrastructure renewal, with many local governments open to using P3 models," stated Jennifer Reynolds, president and CEO of TFSA, in an email to the Daily Commercial News.

A challenge the P3 marketplace in Canada may face in the future is the size of infrastructure projects, which are often relatively smaller and Ontario's hospital build-out has slowed down, explained Reynolds.

However, the report notes Canada does have a much longer track record with P3s than the United States or Mexico.

"The contribution of Toronto's strong financial services sector, and of major contractors and service providers located in and around SEE CANADA PAGE 6

The Finch West LRT project has earned the Silver Project Financing award from The Canadian Council for Public-Private Partnerships this year. This project is an 11-kilometre light-rail system currently under construction. The LRT is expected to open in 2023. For a full list and descriptions of this year's award winners please see Page 5. The 26th Annual CCPPP National Conference on Public-Private Partnerships

November 5-6, 2018 | Sheraton Centre Toronto Hotel | Toronto, Canada

Conference Presenting Sponsor

Agenda

DAY 1: MONDAY NOVEMBER 5

7:00 Registration & Breakfast

7:00 Women's Infrastructure Network (WIN) Breakfast McCarthy Tétrault LLP is pleased to once again host the WIN breakfast. We look forward to seeing you!

8:00 Welcome & Opening Remarks

Mark Bain, Chair, The Canadian Council for Public-Private Partnerships and Partner, Torys LLP John Manley, P.C., O.C., Honorary Chair, The Canadian Council for Public-Private Partnerships and President & CEO, Business Council of Canada

Mark Romoff, President and CEO, The Canadian Council for Public-Private Partnerships

8:20 Remarks from the Conference Presenting Sponsor: SNC-Lavalin

8:25 Opening Keynote Address:

Hon. François-Philippe Champagne

François-Philippe Champagne, Canada's Minister of Infrastructure and Communities Minister Champagne will discuss the role public-private partnerships can play in the government's \$180-billion Investing in Canada Plan to successfully and quickly deliver public transit and other key infrastructure projects that build sustainable and socially inclusive communities, drive economic growth and improve quality of life for Canadians. Sponsored by: ACS Infrastructure

8:50 General Session 1: The Great Rewrite — Infrastructure

Leonard Brody, Chairman, Creative Labs
Leonard Brody, an award-winning entrepreneur, venture capitalist, bestselling author and a two-time Emmy nominated media visionary, will use his powerful presentation style to tackle what the rapid pace of global change, innovation and technology disruption mean for infrastructure.

Sponsored by: P1 Consulting

10:20 General Session 2: Getting on Board Next-Gen Transit

The next generation of public transit projects are complicated, costly and closely watched by the public and government. Panellists with responsibility for delivering transit projects worth billions of dollars will discuss the role of P3s in quickly bringing this critical infrastructure to life and in transferring risk successfully, as well as how to navigate some common challenges with projects of this magnitude.

Moderator: **Chantal Sorel**, Executive Vice President and Managing Director, Capital, SNC-Lavalin Inc. and Director, CCPPP

Panel: Jon Lamonte, Chief Executive, Transport for Greater Manchester (TfGM)

Amanda Farrell, President and CEO, Partnerships BC **Ehren Cory**, President and CEO, Infrastructure Ontario and Director, CCPPP

11:30 Speed Networking

Sponsored by: MUFG

11:30 Market Sounding: Newfoundland and Labrador

This 60-minute market sounding session gives project proponents an opportunity to present an important infrastructure project or pipeline of projects to a private sector audience before going to market. Admission is free, limited to 40 delegates.

Presenter: Cory Grandy, Assistant Deputy Minister, Infrastructure, Department of Transportation and Works, Newfoundland and Labrador Sponsored by: Plenary Group

11:30 Breakout Sessions

1A: How to Disrupt & Evolve the Made in Canada P3 Model

This session will discuss possible changes in procurement, risk allocation and financing to help improve P3 project delivery, from the design-build perspective.

Moderator: **Sarah Clark**, President & CEO, Fraser River Pile and Dredge (GP) Inc.

 $\textit{Panel:} \textbf{Tim Heavenor}, \textbf{Chief Financial Officer, Graham} \\ \textbf{Group}$

Douglas R. Sanders, Partner, Public-Private Infrastructure Projects Group, Borden Ladner Gervais LLP *Sponsored by:* Graham Group

1B: Disrupting the Energy Sector

This session examines what structural changes are needed in the energy sector, whether risk allocations are being maximized, and what opportunities there are to further involve the private sector.

Moderator: David McFadden, Counsel, Gowling WLG Panel: Ram Mahidhara, Chief Investment Officer, International Finance Corporation **Brian Bentz**, President and CEO of Alectra Inc. **Ron Dizy**, Senior Vice President, Partnerships and Managing Director, Advanced Energy Centre, MaRS **Olivia Steedman**, Managing Director, Greenfield Investments & Value Creation, Ontario Teachers' Pension Plan

Andrew Clark, Co-Founder & Co-CEO, Spark Power *Sponsored by:* Computershare

12:40 Luncheon

1:15 Canada's Top P3 Projects Celebrated at CCPPP Annual Awards

Meet the people and hear the stories behind some of Canada's leading projects at the 21st Annual CCPPP Awards for Innovation & Excellence in Public-Private Partnerships.

Gold Sponsor: PwC

Silver Sponsors: BTY Group, Englobe, Stuart Olson Construction, Stonebridge Financial Corporation

1:45 Luncheon Keynote Address: Ricardo Rosselló

Ricardo Rosselló, Governor of Puerto Rico, will discuss how his government is working closely with the private sector to renew the Puerto Rican economy and quickly rebuild after Hurricane Maria made a deadly direct hit on the island a year ago, severely damaging the electrical grid, housing, roads and ports. This transformation will require the island to innovate and rethink its traditional ways of operating, presenting new opportunities for future growth and competitiveness.

2:15 Market Sounding: First Nations Major Projects Coalition (FNMPC)

This 60-minute market sounding session gives project proponents an opportunity to present an important infrastructure project or pipeline of projects to a private sector audience before going to market. Admission is free, limited to 40 delegates. The FNMPC has developed a first-of-its-kind First Nation led project support model designed on a commercial basis to unite the interests of private industry and First Nations. This session will cover the anticipated finance and construction needs of Kenney Dam Hydroelectric as the project advances with four First Nations and BluEarth Renewables.

Presenter: Niilo Edwards, Executive Director, First Nations Major Projects Coalition Sponsored by: Plenary Group

2:15 Market Sounding: Peru

This 60-minute market sounding session gives project proponents an opportunity to present an important infrastructure project or pipeline of projects to a private sector audience before going to market. Admission is free, limited to 40 delegates.

Presenter: Alberto Necco Tello, Executive Director, ProInversion (Private Infrastructure Promotion Agency), Peru Sponsored by: Plenary Group

2:30 Public Sector Roundtables

These intimate meetings give P3 2018 delegates a chance to talk face-to-face with public sector officials and ask questions about the project pipeline in various regions around the world. Each roundtable will have a public sector representative, a moderator and 10 private sector delegates. After 20 minutes, delegates will switch to another table.

o anome Session A

Gary S. Porter, Executive Director, Corporate Initiatives, Nova Scotia Department of Transportation and Infrastructure Renewal

Divya Shah, Senior Director, Investments, Canada Infrastructure Bank

Morteza Farajian, Acting Deputy Secretary of Transportation, Director of P3 Office, State of Virginia John McKendrick, Executive Vice-President of Project Delivery, Infrastructure Ontario (Social) Public sector representative to be confirmed Session B

Michael Cheong, Chief Financial Officer, York Region Rapid Transit

Mark Liedemann, Vice President, Projects, Partnerships BC

Mauricio Márquez, Head, Hospital Infrastructure Program, Concessions Department, Ministry of Public Works, Government of Chile

Yousef Salama, Manager, Innovation, Los Angeles Transportation Authority

Chris Gauer, President, Major Projects, Infrastructure Ontario (Civil)

2:30 Breakout Sessions

2A: Understanding Operating Risk: Envisioning the Future of P3 Operations

After now 10+ years of operating P3 projects, the marketplace has firsthand experience at managing the risk of operations. Find out what industry experts know now that maybe they didn't fully understand when they bid the project.

Moderator: **Louise Panneton**, Founder and President, P1 Consulting

Panel: Sean Wiley, Executive Vice President, Asset & Contract Management, Infrastructure Ontario
Paul Martin, Senior Vice President, Origination,
Plenary Group

Darryl Brown, Partner, Gowling WLG **Claudio Andreetta**, Director of Business Development, Johnson Controls L.P. *Sponsored by:* Miller Thomson LLP

2B: Back from the Brink: The Resiliency of the P3 Model

Hiccups happen in projects and sometimes they can seem insurmountable. When things go wrong . . . seriously wrong, having a P3 model in place — and a strong team behind it — can save the day. *Moderator:* **Tim Philpotts**, Partner and Senior Vice President, Infrastructure Advisory, Ernst & Young Orenda Corporate Finance Inc. and Director, CCPPP *Panel:* **Joey Comeau**, Senior Vice President, Capital Services, EllisDon Corporation Other speakers to be confirmed

4:00 Breakout Sessions

3A: Together, Building Stronger: The Idea Behind the First Nations Infrastructure Institution

Indigenous communities across Canada have a critical need for new infrastructure. The panel will look at potential new funding models being considered by the FNII in order to develop sustainable approaches made for and by First Nations that ensure a growing number of communities are able to invest and significantly partner in major resource and energy projects that create jobs, training, and economic benefits.

Panel: **Jason Calla**, Director, First Nations Health Authority

Chief Corrina Leween, Cheslatta Carrier Nation Other speakers to be confirmed

3B: Building P3 Bridges: Closing the Gaps for Future Large Scale Infrastructure Projects

The recent financial close on the Gordie Howe Bridge is a milestone for the first transnational P3 for Canada, carrying unique risks along the way. Learn more about the evolution of P3 bridge projects and find out how the lessons learned to date can be applied for future bridge projects and other asset classes.

Moderator: Brian Kelsall, Partner, Fasken Panel: Bryce Phillips, CEO, Windsor-Detroit Bridge Authority

Nuria Haltiwanger, CEO, ACS Infrastructure Tom Barlow, Partner, Fasken Andrew Doctoroff, Senior Advisor to Rick Snyder, Governor of Michigan Sponsored by: Fasken

4:15 Market Sounding: York Region Rapid Transit

This 60-minute market sounding session gives project proponents an opportunity to present an important infrastructure project or pipeline of projects to a private sector audience before going to market. Admission is free, limited to 40 delegates.

Presenter. **Mary-Frances Turner**, President, York Region Rapid Transit

Sponsored by: Plenary Group

4:15 Market Sounding: Jamaica

This 60-minute market sounding session gives project proponents an opportunity to present an important infrastructure project or pipeline of projects to a private sector audience before going to market. Admission is free, limited to 40 delegates.

Presenter: Denise Arana, General Manager, Public-Private Partnerships & Privatisation Division, Development Bank of Jamaica Limited Sponsored by: Plenary Group

6:00 'Night Circus' Reception at the Rec Room

Sponsored by: BMO Nesbitt Burns, Morrison Hershfield, National Bank Financial, Torys LLP and WSP Canada Inc.

8:00 The After-Party Party hosted by the Young Leaders in Infrastructure (YLI)

Agenda

DAY 2: TUESDAY NOVEMBER 6

7:30 Breakfast

7:30 CCPPP Annual General Meeting

8:30 Day 2 Opening Remarks

Mark Bain, Chair, The Canadian Council for Public-Private Partnerships and Partner, Torys LLP

8:40 Keynote Address: Joseph Mancinelli

Joseph Mancinelli, International vice-president and Central and Eastern Canada Regional Manager, LIUNA (Labourers' International Union of North America), discusses why he spearheaded the union's almost \$8-billion pension fund to make significant investments in P3 infrastructure projects. A bold initiative that has meant the union's 120,000 Canadian members are not only the backbone of creating and operating these much-needed infrastructure projects, they also benefit from the strong returns these investments have generated.

9:10 General Session 3: Infrastructure Ministers Talk

With 60 provincial projects completed and almost 60 more in the planning, procurement and construction phase, Ontario has been Canada's largest P3 market for close to three decades. In Newfoundland and Labrador, interest is growing in P3s with two projects in the health-care sector currently in the procurement stage, a third under construction and one starting procurement soon. The ministers will discuss their government's infrastructure priorities and what's next for the future of P3 in their jurisdictions.

Moderator: **Jennifer Aument**, President, Transurban North America

Panel: **Monte McNaughton**, Minister of Infrastructure, Ontario

Steve Crocker, Minister of Transportation and Works, Newfoundland & Labrador *Sponsored by:* Aon Risk Solutions

10:30 General Session 4: Global Smart Cities: Leading the Digital Revolution

This panel will look at what governments need to do to capitalize on and manage the high-speed digital change and where the private sector can best spark innovation.

Moderator: Kelly Gillis, Deputy Minister of Infrastructure and Communities, Government of Canada

Panel: **Ger Baron**, Chief Technology Officer, City of Amsterdam

Gunnar Edwin Crawford, Head, Stravanger Smart City, Norway Other speakers to be confirmed Sponsored by: GHD

11:40 Breakout Sessions

4A: Expensive, Prolonged and Problematic: Dispute Resolution in P3 Projects

This panel of industry, government and legal officials have survived the full dispute resolution process and will focus on the hard lessons learned, as well as the differences in navigating disputes with a government partner.

Moderator: Tim Murphy, Co-Chair, Aboriginal, Government Relations, Project Finance, Infrastructure and Energy, McMillan LLP Panel: Patrick Freer, Senior Vice President, Asset Management, Fengate Real Asset Investments Agnes von dem Hagen, Legal Counsel, Infrastructure Ontario

Hagit Muriel Elul, Co-Chair, Arbitration Practice Group, Hughes Hubbard & Reed LLP Jason J. Annibale, Partner and National Co-Chair, Construction, McMillan LLP Sponsored by: McMillan LLP

4B: The Pacific Alliance: New Opportunities for P3s in South America

The Pacific Alliance is a regional initiative created by Chile, Colombia, Mexico and Peru to promote greater competitiveness and economic growth. Hear from senior officials about the infrastructure opportunities available in their respective countries and how P3 expertise will factor into their growing project pipelines.

Moderator: Jordan Schwartz, Director, Infrastructure, PPPs and Guarantees (IPG), The World Bank

Panel: Alberto Ñecco, Executive Director, ProInversión (Private Investment Promotion Agency), Peru

Mauricio Marquez, Head, Hospital Infrastructure Program, Concessions Department, Ministry of Public Works, Government of Chile Carlos Alberto Sandoval, Vice President, Structuring and Project Management, Financiera de Desarrolo Nacional (FDN), Colombia

11:50 Market Sounding: Los Angeles Metro

This 60-minute market sounding session gives project proponents an opportunity to present an important infrastructure project or pipeline of projects to a private sector audience before going to market. Admission is free, limited to 40 delegates.

Presenter: Yousef Salama, Manager, Public-Private Partnerships, Los Angeles Metro Sponsored by: Plenary Group

12:50 Luncheon & WIN Awards Celebration

The Women's Infrastructure Network profiles the recipients of the 2018 Outstanding Leader and Emerging Leader Awards.

1:30 Luncheon Keynote Address: Pierre Lavallée

Pierre Lavallée, President and CEO, Canada Infrastructure Bank. Mr. Lavallée will outline the mandate of the Bank and its corporate plans and strategies to enable innovative investments in transformational infrastructure projects.

2:00 Remarks

Mark Romoff, President and CEO, The Canadian Council for Public-Private Partnerships

2:00 Market Sounding: Argentina

This 120-minute market sounding session is an overview of how to tap into the unique opportunity of infrastructure financing within the Argentine PPP framework. Admission is free, limited to

40 delegates. Presenter: **Tomás Darmandrail**, National Director of Executive Coordination for PPP, Ministry of Finance, Argentina Sponsored by: Plenary Group

2:10 Remarks from Dentons, Presenting Sponsor for Autonomous Vehicle P3s: Visions of the Future

2:15 Keynote Address: Andreas Mai

Andreas Mai, Executive Vice-President, Market Development and Innovation, Keolis North America, details the future impacts of autonomous vehicles on transportation networks.

2:45 Panel 1: Curves Ahead: Rethinking Transportation in the Age of Driverless Vehicles

What are the latest automated vehicle technologies in this ever-changing sector? How will they impact transportation network planning and deployment?

Moderator: **Sarah Houde**, Executive Director, Propulsion Québec

Panel: **Sharad Agarwal**, Senior Vice President, North America, EasyMile

Marko Kroenke, Head of Technology, Global Product Management, Bombardier Transportation Adam Blinick, Director, Public Policy and Communications, Uber Canada Sponsored by: Johnson Controls

2:45 Panel 2: Driving Change with P3s: Scaling Up Autonomous Vehicle Transportation Networks

What role can industry play in driving the move to automated vehicles? What policy and incentives does government need to implement in this global sector?

Moderator: Josipa G. Petrunic, Executive Director & CEO, Canadian Urban Transit Research and Innovation Consortium

Panel: **Karl Schober**, Associate, Corporate Group, Dentons

Other speakers to be confirmed Sponsored by: IBI Group

4.45 Closing Remarks

4:50 Closing Networking Reception

2018 Award Winners

The CCPPP National Awards for Innovation and Excellence in P3

Fort McMurray West 500 kV Transmission Project (GOLD - Project Financing Award)

This vital power project, stretching 500 kilometres northeast from Edmonton, will increase the capacity and overall reliability of Alberta's transmission system in order to meet booming demand in the Fort McMurray area when it becomes operational in 2019. This is also the first transmission infrastructure P3 to be procured in Capada

The awards committee commended the project's use of a "unique funding competition that took place after the route for the transmission line was finalized and regulatory approval had been granted, resulting in significant savings for the public. The competition resulted in a combination of medium- and long-term bonds priced to appeal to different investors and a dual tranche structure that created a very cost effective quarterly pay financing. Sponsors with upfront project development activities will be keenly interested in the ground-breaking approach Alberta has taken with this mega-project."

At the time of award, the cost savings was estimated to be more than \$400 million — approximately 25 per cent of total capital costs.

Partners: Alberta Electric System Operator & Alberta PowerLine Limited Partnership, a consortium of Canadian Utilities Ltd., Quanta Services CC Canada Ltd., Valard Construction LP and ATCO Electric.

The City of Saskatoon's North Commuter Parkway & Traffic Bridge Project (GOLD - Infrastructure Award)

When Saskatoon residents and civil and Indigenous leaders came together to celebrate the official opening earlier this month, it was clear this project was about more than improved infrastructure and reduced commutes. It was also building a more inclusive community.

The new six-lane bridge on the Parkway pays tribute to Chief Mistawasis, the Cree Chief who signed Treaty 6, while the modern steel-truss structure of the rehabilitated Traffic Bridge uses complex engineering to preserve its historical character while meeting today's safety standards.

The project is the largest infrastructure project ever delivered in the City of Saskatoon and the first bundled transportation P3 in Canada. "The city and consortium worked closely together to ensure community engagement, to manage artifact recovery and to accelerate approvals. The project bundling helped to significantly lower costs for residents and improve traffic in a bustling part of the city." The project's cost savings by using the P3 delivery model are estimated at \$69.4 million, compared to conventional project procurement.

Partners: City of Saskatoon and Graham Commuter Partners, a consortium of Graham Infrastructure, ASL Paving, BBGI, Buckland & Taylor Ltd., Clifton Associates Ltd., National Bank Financial, Tetra Tech, Urbaser Environment (Valorga).

Quad at York University (SILVER - Service Delivery Award)

Every student knows how important it is to be close to campus to optimize time for classes, research and studying. In August 2017, York University opened the first phase of Quad, offering much-needed apartment-style accommodations for more than 800 students in Toronto.

The project is among the largest student housing P3 endeavours ever undertaken in Canada and uses a model that freed York from risks associated with capital costs, operations and maintenance, enabling the university to focus its resources on its academic mission.

Under the agreement, Forum-Campus Suites operates and maintains the new housing on land leased from the university, and York ensures the needs of its students are met by providing guidance on the private sector's operations. In addition to lease revenues, York also benefits from additional payments based on the success of the project.

Designed with the student in mind, the P3 model has created "a real partnership at York that has resulted in a purpose built community that provides a live/work/play environment with significant student amenity space. This environment has led to quick improvements in how and where services are provided to the benefit of busy students," the awards committee noted. "The Quad P3 could prove a useful model for similar social housing projects in municipalities and universities across Canada."

Partners: York University and Forum-Campus Suites

Milton District Hospital Expansion (SILVER - Infrastructure Award)

As one of Canada's fastest growing communities, Milton needed to improve and expand its hospital — and fast. Opened in October 2017, the 455,000-sq. foot facility means residents of all ages and abilities can stay close to home and access a wide range of health-care services.

The expansion, designed with community, staff and patient input, was delivered on time and on budget in just 25 months and took place without disrupting essential and lifesaving clinical services at the existing hospital building. The project, which employed 600 workers at its construction peak and created 200 new jobs within the hospital, transferred significant risk to the private sector partner and resulted in projected cost savings of \$124.9 million.

"This project is remarkable in how well the community, health-care staff and partners worked together to create an integrated hospital that truly put the needs of Milton residents at its core," said the awards committee.

"The high degree of collaboration among the various parties and the smooth integration of client feedback contributed to very few changes during construction and a relatively limited number of minor deficiencies at substantial completion. This challenging but very successful brownfield development involving integration with the adjacent operating hospital building demonstrates what can happen when the same firms partner on multiple projects of the same type and become leaders in the field."

Partners: Halton Healthcare & Plenary Health, a consortium of Plenary Group Canada Ltd., PCL Constructors Canada Inc., B+H Architects, RTKL Associates, RBC Capital Markets and Johnson Controls Canada LP. Infrastructure Ontario acted as the procurement agency.

Finch West LRT Project (SILVER - Project Financing Award)

Under construction in northwestern Toronto, the 11-kilometre light-rail system is an Ontario government priority to transform the busy Finch Avenue West corridor. The LRT system will have 18 stops to connect commuters and families to local and regional transit services; deliver economic and job creation opportunities; and transform Finch Avenue West into a vibrant community, accessible to motorists, transit riders, cyclists and pedestrians alike. The LRT is expected to open in 2023.

The awards committee found that the project has "clear benefits to the community and economy," noting the consortium is developing an apprenticeship plan to ensure historically disadvantaged groups are involved in constructing the line.

The \$1.4-billion Finch West LRT project utilized more than \$800 million in private financing consisting of short-term bank financing combined with a cost efficient combination of medium- and long-term bonds. The project reached financial close in an "impressive" 26 days — an Ontario P3 record, the awards committee noted. Importantly for an LRT project, the financing structure was also designed to accommodate future system expansion. Overall, the P3 project has an estimated cost savings of \$566 million via the alternative financing and procurement model.

Partners: Infrastructure Ontario, Metrolinx and Mosaic Transit Group, a consortium of Aecon Concessions, ACS Infrastructure and CRH Canada Group Inc.

Canada as an international P3 super cluster

CONTINUED FROM PAGE 1

Toronto, make it a unique market from a P3 context," Reynolds stated. "Canada's design, build, finance, operate and maintain P3 model, and its variations, is a repeatable template that is highly successful and is applicable to innumerable project sponsors at home and abroad."

She added, "Toronto has established access to longterm bond and bank financing for P3 infrastructure projects, providing access to committed, fixed-rate financing. This is unique to Canada as most other countries primarily use bank financing as a source of debt, especially since the global recession."

The TFSA surveyed a broad sample of international finance professionals about trends and innovations in financial services, asking them to benchmark global financial centres based on their potential to gain from an increasing use of P3s in delivering the next wave of infrastructure development.

As a follow-up to the benchmarking study, the TFSA worked with KPMG to develop the Knowing When to Partner report on the role that Toronto's financial services professionals play in supporting the city's status as a P3 "super cluster."

"The investments made by its banks, life insurers and infrastructure funds have helped to establish Canada as an international P3 super cluster," the report states. "Montreal and Vancouver are also integral to this success. These two cities ranked ninth and 10th respectively in our benchmarking study of financial centres with the most potential to gain from an increased use of P3s in infrastructure financing."

Some examples of Canadian P3 projects include:

- the Mackenzie Vaughan Hospital Vaughan, Ont. (\$1.6 billion);
- the Valley Line Southeast Light Rail Transit (LRT) Edmonton (\$1.8 billion);
- the Highway 407 East Phase 2 in Durham Region, Ont. (\$1.2 billion); and
- the Fort McMurray West Transmission Line, Fort McMurray, Alta. (\$1.6 billion).

Discussions to highlight lessons learned, working towards new solutions

CONTINUED FROM PAGE 1

labour union's almost \$8-billion pension fund make significant investments in P3 infrastructure projects across the country.

The bold initiative means the union's 120,000 Canadian members — who work in construction, manufacturing and commerce, and the public service — are not only the backbone of creating and operating these muchneeded infrastructure projects for their fellow Canadians, they're also benefitting from the strong returns these investments have generated.

But first, François-Philippe Champagne, Canada's minister of infrastructure and communities, will officially open P3 2018 with his keynote speech on the role P3s can play in the federal government's \$180-billion Investing in Canada Plan. Over the next 12 years, the plan is set to fund and quickly deliver key infrastructure projects like transit that build sustainable and socially inclusive communities, drive economic growth and improve quality of life for Canadians.

Speaking of transit, which is one of the fastest growing P3 sectors in Canada, we'll get an international perspective on how to navigate some common challenges with projects of this magnitude — such as transferring risk successfully — from experts from the United Kingdom, British Columbia and Ontario in our Getting On Board Next-Gen Transit panel.

The pressing need for high-quality critical infrastructure in Indigenous

communities will also have the spotlight in one of the first of our new Market Sounding sessions as well as a breakout session this afternoon.

"Speaking of transit, which is one of the fastest growing P3 sectors in Canada, we'll get an international perspective on how to navigate some common challenges with projects of this magnitude — such as transferring risk successfully — from experts from the United Kingdom, British Columbia and Ontario in our Getting On Board Next-Gen Transit panel."

- Mark Romoff

Learn about Kenney Dam Hydroelectric, a pilot project of the First Nations Major Projects Coalition, as well as the work underway by the new First Nations Infrastructure Institution on innovative funding models it's developing to ensure a growing number of Indigenous communities are able to invest and significantly partner in major resource and energy projects that create jobs and drive economic benefits while providing valued training and development opportunities.

As I mentioned, this is the first year we've offered our Market Soundings as well as our Public Sector Roundtables. We're really excited about these new networking opportunties, which will feature senior representatives from Newfoundland and Labrador, Ontario, British Columbia, Nova Scotia, York Region Rapid Transit Corporation, the United States, Jamaica, China and Chile, to name just a few.

In all of our discussions at P3 2018, I think we may find that this is the perfect time to disrupt and further evolve the "made-in-Canada" P3 model, which has become globally renowned over the past two decades. Instead of fighting the change, we should find the best ways to lean into it.

What can we learn from our P3 colleagues from around the globe? Ask them. We have infrastructure leaders from 20-plus countries here.

Or how about from those closer to home who are innovating the P3 model in a variety of ways? We'll celebrate five projects that have done just that at this year's National Awards for Innovation and Excellence in Public-Private Partnerships. Be sure to have a chat with those who have been principal players in these success stories.

These next two days in Toronto are all about forward thinking. It's about discussing the challenges and lessons learned as we work towards solutions that meet the world's infrastructure needs now and for decades to come to push forward happier, more connected and prosperous communities.

Enjoy the conference.

Everything on one powerful platform.

Manage multiple projects—from tendering to closeout—with the only construction software that connects the field and office in one central hub.

Easy to use

Our products are designed to be intuitive, because difficult software is rarely adopted.

Unlimited users

Build a truly collaborative environment with unlimited user licenses, at no additional cost.

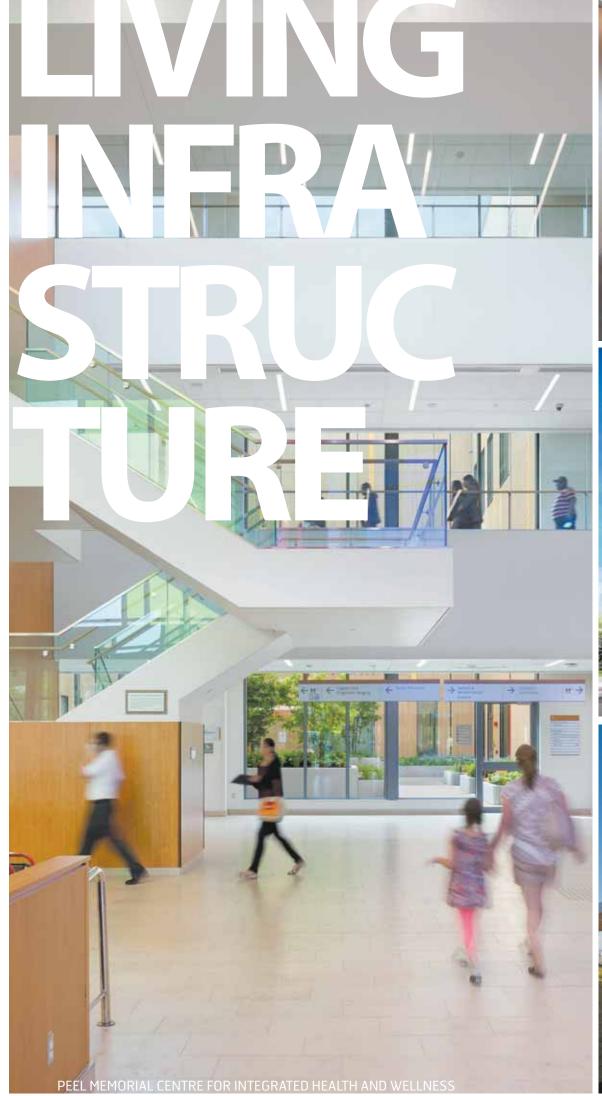

Unrivaled support

(p) Consulting

Building on our extensive knowledge and experience, P1 Consulting provides a suite of advisory and support services on complex projects. We are leaders in:

- ► Fairness Advisory Services
- ► Procurement Services
- ► Facilities Management Advisory Services
- ► Infrastructure Projects Development & Implementation

What our business partners are saying about us...

"...you delivered practical and insightful advice in response to challenges that our organization had never faced before. The kind of advice that you can use to make difficult decisions with the comfort of being accurate. Advice that only comes from an expert knowledge of how we do business and what the Government is trying to achieve."

- Senior Vice President, Infrastructure Ontario

Ottawa – 86 Centrepointe Drive, K2G 6B1 Toronto – 33 Bloor St. East, 5th floor, M4W 3H1
