Welcome

Welcome to our latest Priced Buyers Guide, which has been in the making for the last five years. Whilst it contains a large number of varieties, it is a fraction of the range of plants we supply every day, and so if you are unable to find what you're looking for, please do not hesitate to call.

J. A. Jones was established in 1900, and from those humble beginnings, we now have over 70 dedicated staff working on 5 sites. The business, as it is today, would not exist if it was not for these staff, and our many loyal customers, to whom I would like to say thank you.

Myself and our staff, who currently have a combined total of over 1000 years experience in the nursery trade, are committed to providing the best possible quality and range of plants and service for all your projects, whether large or small.

We have continued to invest in the company, most visibly increasing production in both the range and number of container trees, as well as 5 and 10 litre shrub stock. With the ever increasing threat of diseases from the continent to our indigenous stock (Ash Dieback, Oak Processionary Moth and Xylella fastidiosa to name just three), we continue to monitor bio-security to ensure our stock is disease free.

Our Cash and Carry continues to grow, with an ever increasing range of plants, available for immediate supply, creating the ideal 'one stop shop' for all your plant needs.

We were very sad to have to say goodbye to two members of staff who passed away in May 2017. Fred Savage worked at **J. A. Jones** for 37 years, having joined the company from school. Miss Sheila Jones, granddaughter of our founder John Andrew Jones, was 77 years old, and having left school at the age of 15, worked continuously in the business for 62 years. I hope, in future years, we can continue to be a nursery they would both be proud of.

I would like to wish all our customers a successful and profitable season, and look forward to serving you in the near future.

Mike Vickers
Sales Director.

Technical Specification

Our field grown trees are lifted from mid-October to mid-April, although we do recommend that tree planting takes place from November to March. Our trees are lifted to order to help ensure that they leave 'nursery-fresh'.

Bare-root (B)

The majority of trees lifted from our fields are supplied bare-rooted with the roots bagged for protection. **J. A. Jones** uses a co-extruded bag at no extra cost to the customer to aid their successful establishment by preventing the roots from drying out. Bare root trees enable the tree root run to be lifted intact, while being easy to handle with minimal installation requirements.

Root balled (RB)

Trees of 10cm girth & above can be supplied with wire root-balls. The ball of soil enclosing the roots is secured using hessian, and an un-galvanised wire net. This ensures that the soil remains in intimate contact with the roots throughout lifting, transportation & planting operations. This should always be left in place, and will bio-degrade within two seasons. Hessian root balls are usually provided for trees below 10cm girth. All root balls are easily handled using tree hooks available from **J. A. Jones**. Root balls aid tree establishment at larger sizes, as well as with species which are known to be difficult to transplant. Such species include Betula, Carpinus, Fagus, Liquidamber, Pyrus, Quercus and Robinia species.

Technical Specification

To facilitate planting out of the 'traditional' planting season, *J. A. Jones* offer the following peat free options:

Container (CG)

For trees up to 16cm girth, *J. A. Jones* offer a range of container grown trees. Lifted from our fields, and treated to our usual rigorous pruning regime, they are supplied in bags with convenient woven handles to facilitate handling.

Air Pot (AP)

For trees above 16cm girth, *J. A. Jones* offer a range of air pot trees. The trees are lifted in February, and are planted into the air pot material. This material encourages root branching through air pruning, creating a solid stable root structure in as little as four months. When dispatched, the resulting root ball is wrapped in a hessian and wire basket for delivery. From our own experience, we have consistently demonstrated their value through supply continuity, quality of stock produced, ease of handling and minimal additional cost when compared with larger 'container grown' stock.

Technical Specification

Symbol	Definition	Girth cm		Height cm
1+0	1 year seedling	6-8	Light Standard	250/300
2+0	2 year seedling	8-10	Standard	250/300
0+1	1 year cutting	10-12	Selected Standard	300/350
0+2	2 year cutting	12-14	Heavy Standard	350/425
1+1	2 year transplant, 1x	14-16	Extra Heavy Standard	425/600
1+2	3 year transplant, 1x	16-18	Extra Heavy Standard	450/625
2+2	4 year transplant, 2x	18-20	Extra Heavy Standard	450/650
		20-25	Semi-Mature	500 +

Trees are specified by their girth in centimetres, measured at 1 metre above ground level. Clear stem height, that is, the distance from the ground to the lowest branch, is normally 1.8 to 2.0 metres between the size ranges 12-20cm girth. In contrast, a feathered tree (fthd) is supplied with branches furnished almost down to the ground. Regular transplanting of trees encourages a compact fibrous root system, thereby significantly improving the chances of successful establishment on site. Plants transplanted once are indicated with the symbol 1x, those transplanted twice with 2x and so on. All **J. A. Jones** standard trees have been transplanted a minimum of three times.

Multi-stems (ms)

Multi-stems are sold, not based on girth, but on their height and the number of stems. All multi-stems are provided root-balled to help ensure transplanting success.

Technical Specification

Shrubs

Shrubs are packed either in non-returnable cardboard pallets, wooden crates or returnable metal cages. Although the latter take longer to load & hold less, they allow more delicate plants to be packed upright on shelves. Batch labels detailing the plant name & quantity are always provided.

Confidence

All our plants are provided in accordance with the latest industry standards, although we can accommodate individual client specifications as requested. Our handling of plants is in accordance with CPSE guidelines. By meeting the strict plant health requirements laid down by the Ministry of Agriculture, we are able to export our plants throughout Europe and beyond. Our EC plant passport number is **UK/EW 10337 RP EC Quality**.

We have also confirmed our agreement with the HTA Tree and Hedging Group in which we agree not to knowingly purchase any plants from regions where the disease *Xylella fastidiosa* is known to exist.

Delivery

Deliveries are carried out nation-wide by our own fleet, controlled by our transport manager, to provide a dependable service ensuring that complete deliveries arrive at the time agreed. Should the delivery be outside our operational capabilities, experienced hauliers will be employed and charged at cost. We do not aim to make a profit on our deliveries, but we will charge to help cover the cost. Please note:

- All instructions and contact details should be provided at time of order.
- All access issues must be highlighted to the transport manager prior to delivery.
- Safe unloading of the vehicle is your responsibility. Drivers are not permitted to unload, although they will assist where health and safety regulations permit.
- Lifting equipment and staff to unload are your responsibility. Whilst vehicles are equipped with tail lifts, these are not suitable for unloading root balled trees, while ground conditions often prevent pallet trucks from running smoothly.
- Damage caused by customer staff or equipment will be charged at cost.
- For full loads, we allow a two-hour unloading time, pro-rata for smaller loads. A standing charge of £60 per hour will be charged after that.

Service

Here at *J. A. Jones*, we recognise that it isn't just a good quality plant you are after, but rather the establishment of a successful scheme! To help achieve this, we endeavour to promote and develop closer links with all our customers, whether by telephone, site or office visits. Quotations are typically provided within 24 hours of receipt of the enquiry, whether received by fax, phone, e-mail or post. We are committed to providing a professional & reliable service, with freely given friendly & expert advice.

Contract Growing

In order to help guarantee the success of customer projects, *J. A. Jones* offers a contract grow service. Tried and tested over many years, this service provides significant advantages to both customer and grower alike. These include:

- Guaranteed availability as planning allows adequate time to source unusual items.
- Assured quality through pre-agreed specification.
- Cost savings through economies of scale and forward planning.
- Customer confidence as plant material is available for inspection at any time.
- Ease of operation as the above factors combine to produce the right plant, at the right price, delivered in any combination at short notice.

Supply and Plant

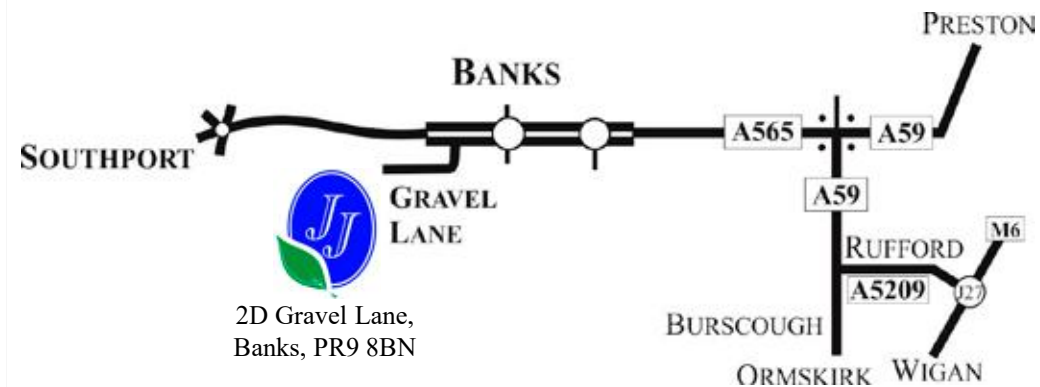

For clients who purchase trees whose size or weight are outside their operational capabilities, *J. A. Jones* offers a supply and plant service. Each job is assessed on an individual basis, and priced following a site visit. During this process, advice on tree suitability and pit specification will be offered to best suit the clients' requirements.

Cash and Carry

Our extensive Cash and Carry is situated one mile north of Southport on the A565:

Payment can be made by Visa, Mastercard, Cash and Account.

With 6 acres of stock to view, and horticulturally trained staff on hand to help, we look forward to welcoming you to the North West's largest wholesale Nursery Cash and Carry.

BETULA

- albo-sinensis <i>Fascination</i> . Fairly slow growing deciduous tree forming a pyramidal crown up to 10m tall. Glossy green leaves turn golden-yellow in autumn. Long showy catkins in early spring. The red-brown shoots peel with age, changing colour through pink and cream before turning pure white - a most attractive feature.	B	8-10	43.64	32.73	27.50

	RB	18-20	238.05	178.54	150.00

- ermanii . A strong growing deciduous tree up to 15m tall, upright at first before broadening with age. Leaves are deep green and rather triangular, turning bright yellow in autumn. These are dropped early in the autumn before other <i>Betula</i> species. The bark is creamy white, tinged cream and pink. Catkins appear with the leaves. Can be susceptible to sea winds. - nigra . River Birch. A fairly fast growing, deciduous tree with an irregular crown shape, which can be rather spreading, reaching up to 15m tall. The young bark starts silvery white before turning shades of pink, orange and brown, to finally almost black. The bark flakes and curls throughout the year giving a fine display. The green leaves turn bright yellow in autumn. Whilst ideal as an informal tree in damp situations, it will withstand drier locations.	B	175/200	22.54	16.90	14.20

Malus Evereste

Malus Rudolph

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
NANDINA					
- domestica. Evergreen shrub up to 2m tall. Green leaves open red-purple before turning green. Foliage turns red-purple in autumn with onset of cold weather. In summer, conical panicles of small white flowers can be followed by red berries.	2L	20/30	8.73	6.55	5.50
	10L	40/60	42.85	32.14	27.00
	20L	80/100	57.13	42.85	36.00

OLEARIA					
- haastii. Evergreen shrub up to 1.5m tall. Small glossy green leaves are white felted below. Profuse white daisy-like flowers in summer.	2L	20/30	3.81	2.86	2.40
	10L	60/80	16.66	12.50	10.50
- macrodonta. Evergreen shrub up to 3m tall. Dull grey-green holly-like leaves, silvery-white below. Clusters of fragrant white flowers in June.	3L	40/60	3.81	2.86	2.40
	10L	60/80	16.66	12.50	10.50

OSMANTHUS					
- burkwoodii. Slow growing evergreen shrub up to 3m tall. Oval dark green leaves are leathery and finely toothed. Very fragrant white flowers in April-May. Will tolerate light shade.	2L	20/30	4.44	3.33	2.80
	10L	60/80	20.00	15.00	12.60
- heterophyllus. Slow growing evergreen shrub up to 3m tall. Dark green holly-like leaves, which become entire with age. White flowers in autumn.	2L	20/30	5.55	4.17	3.50
	10L	40/60	22.22	16.66	14.00
	20L	80/100	27.77	20.83	17.50
- heterophyllus Goshiki. Slow growing evergreen shrub up to 1.5m tall. Holly-like green leaves are marbled with cream, tinged bronze when young.	2L	20/30	7.22	5.42	4.55
	10L	40/60	27.77	20.83	17.50

PACHYSANDRA					
- terminalis. Ground cover evergreen up to 20cm tall. Rosettes of glossy dark green leaves. Spikes of small white flowers in March on previous years shoots.	2L	15/20	3.00	2.25	1.89
	5L	20/30	10.32	7.74	6.50
- terminalis Variegata. Slower growing form with leaves margined cream-white.	2L	15/20	4.13	3.09	2.60

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
PEROVSKIA					
- atriplicifolia Blue Spire. Deciduous shrub up to 1.2m tall. Grey-green aromatic leaves on white stems. Light blue flowers in late summer.	2L	20/30	4.44	3.33	2.80
	5L	40/60	10.32	7.74	6.50

PHILADELPHUS					
- Belle Etoile. Arching deciduous shrub up to 1.2m tall. Ovate deep green leaves. Fragrant single white, maroon-centred flowers in summer.	2L	20/30	3.33	2.50	2.10
	10L	60/80	16.66	12.50	10.50
- coronarius Aureus. Deciduous shrub up to 2.5m tall. Bright yellow ovate leaves, greening with age. Fragrant white flowers in early summer.	2L	20/30	4.44	3.33	2.80
	5L	40/60	10.00	7.50	6.30
- Manteau d'Hermine. Compact shrub up to 1m tall. Small ovate green leaves. Fragrant double creamy-white flowers in early summer.	2L	20/30	3.33	2.50	2.10
	10L	60/80	16.66	12.50	10.50
- Virginal. Vigorous deciduous shrub up to 3m tall. Small ovate dark green leaves. Fragrant double white flowers in June and July.	3L	40/60	3.33	2.50	2.10
	10L	60/80	16.66	12.50	10.50

PHLOMIS					
- fruticosa. Jerusalem sage. Compact evergreen shrub up to 1m tall. Sage-green leaves. Whorls of hooded rich yellow flowers are held in tiers above the foliage in summer.	2L	20/30	4.44	3.33	2.80
	5L	30/40	10.71	8.03	6.75
	10L	40/60	15.08	11.31	9.50

PHORMIUM

Climbers

Passiflora caerulea

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
CLEMATIS					
- armandii . Vigorous evergreen climber with long leathery dark green leaves. Fragrant creamy-white flowers in April-May. Best planted on a sunny sheltered wall.	2L	60/80	13.49	10.12	8.50
	10L C	125/150	23.81	17.85	15.00
	15L F	125/150	57.13	42.85	36.00
- Hardy Hybrids in variety . Deciduous climbers flowering from May to September dependant on varieties in a wide range of colours.	2L	60/80	9.52	7.14	6.00
	10L C	120/150	23.81	17.85	15.00
	15L F	120/150	57.13	42.85	36.00
- montana . Vigorous deciduous climber reaching up to 10m tall, flowering May to June.	2L	60/80	7.14	5.36	4.50
	10L C	120/150	22.22	16.66	14.00
	25L F	120/150	57.13	42.85	36.00
m. alba . Syn. Grandiflora. Pure white flowers.					
m. Elizabeth . Slightly fragrant soft pink flowers.					
m. rubens . Clear rose pink flowers.					
m. Tetrarose . Deep pink flowers.					
- tangutica . Vigorous deciduous climber with hanging yellow lantern shaped flowers from July to October followed by decorative silky seed heads in autumn. Prune hard back each spring.	2L	60/80	11.90	8.93	7.50

FALLOPIA					
- baldschuanica . Russian Vine. Extremely fast growing deciduous twining climber. Panicles of small white flowers in summer and early autumn.	2L	60/80	7.14	5.36	4.50
	10L C	150/175	22.22	16.66	14.00
	15L F	150/175	57.13	42.85	36.00

HEDERA					
- algeriensis Gloire de Marengo . Syn. Canariensis Variegata. Self-clinging evergreen. Large green and grey leaves margined with creamy-white.	2L	40/60	4.44	3.33	2.80
	10L C	150/175	19.84	14.88	12.50

<i>followed by bright red berries.</i>					
- periclymenum Graham Thomas <i>Deciduous</i>	2L	60/80	6.03	4.52	3.80
<i>climber with oval mid-green leaves. White</i>	10L C	150/175	19.84	14.88	12.50
<i>flowers age to yellow from July to September</i>					
<i>followed by bright red berries.</i>					
- periclymenum Serotina. <i>Late Dutch Honeysuckle.</i>	2L	60/80	6.03	4.52	3.80
<i>Deciduous climber with mid green leaves. White</i>	10L C	150/175	19.84	14.88	12.50
<i>flowers are flushed red-purple on the outside</i>	15L F	150/175	57.13	42.85	36.00
<i>from July to October followed by bright red fruits.</i>					

Lonicera periclymenum Belgica

Trachelospermum jasminoides

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
PARTHENOCISSUS					
- henryana. <i>Deciduous self clinging vine. Three or five lobed bronzy-green leaves with prominent silver veins, turning red shades in autumn.</i>	2L	60/80	8.73	6.55	5.50
	10L C	125/150	23.01	17.26	14.50
- quinquefolia. <i>Virginia Creeper. A vigorous deciduous self clinging vine. Three or five lobed deciduous green leaves turn bright red-orange shades in autumn.</i>	2L	60/80	7.62	5.71	4.80
	5L	80/100	11.90	8.93	7.50
	10L C	150/175	22.22	16.66	14.00
- tricuspidata Veitchii. <i>Boston Ivy. Less vigorous than above, this deciduous climber has smaller glossy bright green three lobed leaves which turn brilliant red-purple shades in autumn.</i>	2L	60/80	7.62	5.71	4.80
	10L C	125/150	22.22	16.66	14.00

PASSIFLORA

- caerulea. <i>Blue Passion Flower. Deciduous or semi-evergreen, self clinging by tendrils. Large intricate flowers, blue at the tips, white in the middle, and purple at the base. In warmer areas, large ovoid orange fruit are produced.</i>	2L	20/30	13.49	10.12	8.50
	10L C	120/150	28.57	21.42	18.00

SOLANUM

- crispum Glasnevin. <i>Vigorous semi-evergreen climber with small dark green leaves. Scented purple-blue, yellow-eyed flowers from June to September followed by small yellow-white fruits.</i>	3L	60/80	8.73	6.55	5.50
	10L C	150/175	22.22	16.66	14.00

TRACHELOSPERMUM

- jasminoides. <i>Evergreen climber with small dark green leaves. Highly fragrant pure white flowers from June to September. Best grown in a warm protected location.</i>	3L	60/80	13.49	10.12	8.50
	10L C	150/175	28.57	21.42	18.00

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
VITIS					
- coignetiae. <i>Fast growing deciduous vine with large heart shaped shallow lobed leaves. Brown underneath, they turn crimson-red shades in autumn. Small purple-grey grapes.</i>	2L	60/80	13.49	10.12	8.50
	10L C	120/150	28.57	21.42	18.00
- vinifera Purpurea. <i>Deciduous woody climber with purple lobed leaves which turn purply-red in autumn. Unpalatable grapes produced.</i>	2L	60/80	13.49	10.12	8.50
	10L C	120/150	28.57	21.42	18.00

WISTERIA

- floribunda. <i>Vigorous deciduous climber with pinnate green leaves, turning yellow in autumn. Blue fragrant pea-like flowers are carried in long pendant racemes in May-June as leaves open.</i>	2L	60/80	13.49	10.12	8.50
	10L C	125/150	28.57	21.42	18.00
- sinensis. <i>Vigorous deciduous climber with pinnate green leaves, turning yellow in autumn. Racemes of lilac blue flowers in June. Stems twine in an anti-clockwise direction.</i>	2L	60/80	13.49	10.12	8.50
	10L C	125/150	28.57	21.42	18.00
- sinensis Alba. <i>As above, with white flowers.</i>	2L	60/80	13.49	10.12	8.50
	10L C	125/150	28.57	21.42	18.00

Bamboos

Phyllostachys aurea

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
FARGESIA					
- murielae . <i>Syn. Arundinaria murielae</i> . Clump forming up to 4m tall. Arching bright green canes age to dull yellow. Narrow soft green leaves.	3L		13.49	10.12	8.50
	10L		30.95	23.21	19.50
- murielae Simba . <i>Syn. Arundinaria murielae Simba</i> . Clump forming up to 2m tall. Similar to <i>murielae</i> in habit but less vigorous.	3L		13.49	10.12	8.50
	10L		30.95	23.21	19.50
- nitida . <i>Syn. Sinarundinaria nitida</i> . Clump forming up to 3m tall. Upright purple flushed canes arch at the tips. Narrow delicate green foliage.	3L		13.49	10.12	8.50
	10L		30.95	23.21	19.50

PHYLLOSTACHYS					
- aurea . Clump forming up to 5m tall. New canes emerge bright green before ageing to pale yellow, deep dull yellow in sun.	18L	200/250	76.18	57.13	48.00
	30L	250/300	101.57	76.18	64.00
	50L	300/350	114.26	85.70	72.00
- aureosulcata 'Aureocaulis' . Clump forming up to 6m tall. Canes are bright yellow, which in full sun take on an burnt orange colour.	20L	200/250	85.70	64.27	54.00
- bissettii . Vigorous, clump forming up to 8m tall. The 50mm thick canes start off green, lightening in colour as they age. Plant in a contained area.	15L	150/180	69.83	52.37	44.00
	20L	200/250	85.70	64.27	54.00
- nigra . Clump forming up to 5m tall. Canes emerge green, ageing to dark brown then black, arching with age. Plant in a contained area.	20L	200/250	85.70	64.27	54.00
	30L	250/300	117.44	88.08	74.00
	50L	300/350	146.00	109.50	92.00

PLEIOBLASTUS					
- variegatus . <i>Syn. Arundinaria variegatus</i> . Low growing forming thickets of pale green canes up to 1m tall. Green leaves are variegated with a creamy-white stripe.	2L		11.03	8.27	6.95
- viridistriatus . <i>Syn. Arundinaria auricoma</i> . Clump forming up to 1m tall. Purple tinged canes. Leaves are variegated yellow and green. Best in full sun.	2L		11.03	8.27	6.95
	10L		22.22	16.66	14.00

Species	Form/ Height/		1-24	25-99	100+
	Pot Size	Girth			
PSEUDOSASA					
- japonica . <i>Syn. Bambusa metake</i> . Fast growing up to 6m tall. Large dark green glossy leaves up to 25cm long. Best planted in a contained area. Tolerant of shade and some wind.	25L	180/210	44.44	33.33	28.00

SASA					
- veitchii . Spreading, forming clumps up to 1.2m tall. The edges of the lance shaped, dark green leaves 'wither' to a light brown in late summer, giving a variegated effect around the leaf margin.	3L	20/30	13.49	10.12	8.50

FORSYTHIA	TAXUS baccata
FUCHSIA	VIBURNUM opulus
HEBE	VINCA
HYPERICUM	WEIGELA
ILEX	YUCCA
JUNIPERUS	

Planting Centres & Densities

How many shrubs are required? To answer this question, follow these simple steps. Firstly, determine the planting centres (that is, how far apart the shrubs will need to be planted) using the table below, by giving some thought to what the approximate spread of the shrub will be after say, 10 years. Remember to reduce the spread by 10% if the plants are for the cooler northern areas of Britain. The following will act as a useful guide when considering shrubs in pots no greater than 3 litres:

Spread of Plant		For Garden Schemes		For Landscape Schemes		For Difficult Locations
0.5m	=	400mm	-	400mm	-	300mm
0.6m	=	500mm	-	500mm	-	400mm
0.7m	=	500mm	-	500mm	-	500mm
0.8m	=	600mm	-	500mm	-	500mm
0.9m	=	700mm	-	600mm	-	600mm
1.0m	=	800mm	-	600mm	-	600mm
1.2m	=	1100mm	-	600mm	-	600mm
1.3m	=	1200mm	-	700mm	-	600mm
1.4m	=	1200mm	-	700mm	-	600mm
1.5m	=	1300mm	-	700mm	-	600mm
1.6m - 2.0m	=	1300mm	-	800mm	-	700mm

Having worked out the planting centres, it is now possible to determine the planting densities, that is, the actual number of plants required per square metre (m²), by using a second table provided below:

Centres		Number of Plants	Centres		Number of Plants
350mm	=	8.16 / m ² *	800mm	=	1.56 / m ²
400mm	=	6.25 / m ²	1100mm	=	0.83 / m ²
500mm	=	4.00 / m ²	1200mm	=	0.69 / m ²
600mm	=	2.78 / m ²	1300mm	=	0.59 / m ²
700mm	=	2.04 / m ²	1500mm	=	0.44 / m ²

For example, if a plant with a **spread of 0.8m** is to be used within a **landscape scheme**, the **centres should be at 500mm** & the **density 4 plants/ m²**. Thus, a scheme with a 10m² shrub bed will require a total of 40 plants.

* For small-scale schemes, figures for densities should be rounded up to the nearest half or whole number before calculating the total number of plants required.

Terms & Conditions

Price

Prices quoted are ex-nursery and exclude packing unless otherwise agreed. Prices exclude VAT. Plants will be invoiced at the prices ruling at the time of despatch. Transport is chargeable at a minimum of £65. Telephone orders must be confirmed in writing within three days. The Company reserves the right to adjust prices during the season. All orders are accepted subject to stock availability at the time of order. Small orders less than £250 are subject to a minimum order surcharge of £30.

New Customers

New customers will be required to complete a credit application form requesting two trade references, prior to acceptance of orders. Prepayment by credit card, cheque or cash will be required with the first order.

Payment

Payment must be made in full within 30 days from the end of the month in which the invoice is raised unless otherwise agreed in writing. The Company reserves the right to charge interest at 4% above bank base rate together with legal fees on accounts outside of the agreed terms.

Cancellation

If the Customer cancels an order after the goods are allocated to the order, the Customer agrees to pay the Company 80% of the cancelled order value as liquidated damages without having to prove damage. Only when the Company claims a higher percentage will the Company be obliged to supply proof of purchase.

Delivery

The Customer must have staff available to help unload delivery vehicles immediately on their arrival. Container plants and heavy trees are impossible to unload single-handed. All consignments must be carefully examined on receipt and signed for by the Customer. The Company cannot be held responsible for losses after delivery. No claims for shortages or damages can be accepted for requested delivery to insecure or unmanned premises. Complaints must be made within two days of receipt of goods and confirmed in writing within seven days. The Company's responsibility ceases when goods are delivered to the Customer or when collected by a carrier.

Risk & Title

Risk in the goods will pass to the Customer upon delivery. Legal title to the goods supplied will not pass to the Customer until the Company receives full payment. Should the Customer appoint a trustee in bankruptcy, receiver or liquidator, having disposed of the

Terms & Conditions

goods to a third party, then the proceeds from the sale of goods must first be used to satisfy the Company account.

Liability

The Company's maximum liability for plants supplied is limited to the replacement, or a refund of the price. Any other claim including consequential losses is excluded. The Company will endeavour to check all plants leaving the nursery but as mistakes can occur, the Company will be pleased to rectify any genuine error made, but not in excess of the invoice value of the goods in question. The Company cannot be held responsible for damage in transit where the Customer has arranged own transport. The Company cannot be held responsible for damage caused after delivery, for losses by frost, flood or drought, nor for plants, which fail to grow through bad weather conditions or other causes beyond the Company's control.

Force Majeure

The Company shall not be liable to the Customer or be deemed in breach of contract by reason of any delay in performing or any failure to perform any of the Company's obligations in relation to the goods if the delay was due to any cause beyond the Company's reasonable control.

Notice of Assignment

All invoices issued will be absolutely assigned to a Factor except by prior arrangement.

THE PLACING OF AN ORDER IMPLIES ACCEPTANCE OF THESE TERMS & CONDITIONS.
