

Rare flora of the Mullewa area

These rare species are found in very small numbers at only a few locations. They are threatened by land clearing, drought, weed invasion and grazing.

Net-veined gyrostemon (*Gyrostemon reticulatus*)

Habitat Dense shrubland in disturbed areas
Description A shrub to one metre tall
Flowering time August to December

Kalbarri spider orchid (*Caladenia wanosa*)

Habitat Sandstone outcrops, the top edges of gorges and open woodland
Description An orchid three to eight centimetres tall
Flowering time August to September

Irwin's conostylis (*Conostylis dielsii* subsp. *teres*)

Habitat Heath, scrub and low open woodland
Description A herb 13 to 33 centimetres tall
Flowering time July to August

Thick-margined leucopogon (*Leucopogon marginatus*)

Habitat Shrubland and heath
Description A shrub 0.4 to one metre tall
Flowering time July to August

Varnish bush (*Eremophila viscida*)

Habitat Open woodland and scrub
Description A shrub 1.2 to four metres tall
Flowering time September to November

Beard's mallee (*Eucalyptus beardiana*)

Habitat Sand dunes and ridges
Description A mallee tree three to five metres tall
Flowering time August to September
