

Wednesday Walk - Brindabella Road, Piccadilly Circus, Bull's Head & Mt Franklin Road - 15 December 2010

We had more of a drive than a walk, stopping at one place on Brindabella Road not far from Piccadilly Circus then exploring under the powerlines just past Piccadilly Circus and finally, walking from the Bull's Head picnic shelter along the ridge then back along the Mt Franklin Road. There were many interesting plants including many in flower. Several orchid species were seen - *Stegostyla alpina*, *Gastrodia sesamoides*, *Diuris monticola*, *D. sulphurea*, *Simpliglottis valida* and a hyacinth orchid (*Dipodium* sp.) in bud. Other flowers were *Tetratheca bauerifolia*, *Stackhousia monogyna*, *S. viminea*, *Olearia erubescens*, *O. megalophylla*, *Dianella tasmanica*, *Euphrasia collina*, several *Pimelea* species, *Stylidium* ? *armeria*, *Epacris breviflora* and many more things including some lovely *Poa* species.
