A close-up photograph of a Bulbophyllum triste alike orchid spike. The spike is a long, pendulous raceme of numerous small, vibrant purple flowers. The flowers are densely packed and have a slightly tubular shape. The background is a plain, light grey color. A large, bright green leaf is visible on the left side of the frame, partially obscuring the spike. Another spike is visible in the upper left corner, and a third, more blurred spike is in the lower right corner. The overall composition is clean and focused on the intricate details of the orchid's inflorescence.

(2 - 3 bulb plant)

\$30

A photograph of a Pinalia philippinensis orchid plant. The plant has several upright stems with long, narrow, green leaves. The flowers are small, light pinkish-white, and arranged in a dense, drooping raceme. The background is black. In the top right corner, there is a white circular badge containing the price "\$50".

A cluster of vibrant purple Vanda Korb Fah orchids is shown in full bloom. The flowers are densely packed and feature a rich, deep purple color with a subtle, darker purple mottled pattern on the petals. The orchids are set against a background of lush green foliage, which is slightly out of focus. In the top right corner, there is a white circular badge containing the price '\$45'. The overall image is bright and clear, highlighting the intricate details of the orchid's structure.
