

Priorities Action Statement

Narrow-leaved *Plectranthus* (*Plectranthus allopectus*)

Action Title	Priority
Determine current population size and demography.	3
Survey areas of potential habitat for further populations; survey Wilson Peak locality to verify occurrence of <i>Plectranthus allopectus</i> at this locality.	3
Conduct research to determine ecological requirements, including fire ecology, and undertake field studies to monitor seedling establishment and survivorship. May involve autecological study or literature search for information on similar species.	2
Consider location of known and potential habitat in fire plans and hazard reduction burn planning.	3
Prepare and implement a site management plan for the population in Bald Knob SF.	2
Maintain ex situ populations at suitable botanic gardens, regional gardens or nurseries.	2
Ensure park planning and operations takes into consideration the population of <i>Plectranthus allopectus</i> on/near Mt Wilson management trail.	3
Identify roadside populations of <i>Plectranthus allopectus</i> and protect during any roadworks.	3
Collect seed for NSW Seedbank. Develop collection program in collaboration with BGT - multiple provenances.	2
Investigate seed viability, germination, dormancy and longevity (in natural environment and in storage).	2
