# Dear Customer,

*We are proud to present to you our new autumn catalogue 2023. As every year, CSW Landscaping offers a large range of flower bulbs that have been specifically selected to meet the demands of landscapers, municipalities, botanical gardens and other horticulturists who incorporate large quantities of flower bulbs.*

*The range has been revised to better meet your requirements and to keep up with the rapid developments in availability and quality of varieties.*

*Behind the scenes we work hard on innovative and sustainable developments. We are certified MPS-ECAS and Skal and we work with our suppliers on further automation and expansion of our customer-friendly order processing. Fortunately, this is possible thanks to the continuous growth of the last years and the valuable feedback from you, our customer. There is a need for certification and a growing interest in sustainable blends, blends that come back several years in a row. Therefore, our assortment is richly filled with mixtures that will bloom beautifully year after year. Perennials also meet that wish and are a sustainable addition for the future.*

*We also want to satisfy the demand of the horticulturists who want to compile a mixture themselves, or in collaboration with us. Whether you want a colourful border with botanical tulips or a wonderfully fragrant mixture that attracts bees and butterflies, it's all possible!*

*In addition, the CSW Landscaping team has its own planting machines and, at least as important, people with expertise to make every planting plan a success.*

*As well as the above advantages of buying flower bulbs from CSW Landscaping, you can also count on us for excellent quality flower bulbs and proper delivery. To simplify and speed up the ordering process, you can also order your flower bulbs through our online store: [www.cswlandscaping.com](http://www.cswlandscaping.com).*

*We hope that you will enjoy browsing through our catalogue and look forward to welcoming you again as a customer this autumn!*

**CSW Landscaping Team**

# Who are CSW Landscaping?

CSW Landscaping is part of the CSW Group that has held a leading position as a supplier of flower bulbs for more than 90 years.

Our goal is to make bulb flowers easily accessible for municipalities, gardeners, botanical gardens and other horticulturists who incorporate larger quantities of flower bulbs. We are also happy to help you design and implement a planting plan for your project.

In this way, together with you, we ensure that your project is in full bloom with the most beautiful colours. Thanks to carefully composed mixtures with early flowering and late flowering varieties, you can enjoy a wonderful spectacle of scents and colours for a long time. We are also happy to think along with you by offering for example low-maintenance mixtures that are suitable for multi-year flowering.

Thanks to our online ordering portal **[www.cswlandscaping.com](http://www.cswlandscaping.com)**, purchasing flower bulbs has never been easier. In a few clicks you have immediate insight into our assortment, availability and delivery time.

## **Transparency**

No complicated price lists, our handy packaging has a clear price. In a few clicks you have selected your bags of tulips and other bulbs, paid and delivered to your home within a few days. The indicated prices are based on the smallest packing unit. If you need large numbers for your project, we will gladly make a customised offer.

## **Simplicity**

In your personal account you have an immediate overview of your orders, payment term, order confirmations etcetera. After ordering you will automatically receive an order confirmation in your mailbox. Are you looking for something outside of our assortment? We have the largest possible access to suppliers in the Bulb Region, the historical Dutch flower-growing area. You can also choose to request a quote online. This can easily be converted into an order.

## **Freedom**

You can order wherever and whenever you want. If this has to happen in the evening after a busy day at work, then this is done in a few clicks. You choose the desired delivery method yourself. The next morning we see your order. If you have a personal account, the agreed payment term is automatically used. If you order without an account, the order will be paid in advance.

We are constantly optimising our products, delivery methods, delivery times and our services. Online orders can be sent the same day with immediate availability and can be followed with a track & trace.

If you have any questions about our products and services, the CSW Landscaping team is ready to assist with its knowledge and expertise.

Mixtures

# Early Bird

A colourful mixture of *Crocus chrysanthus* for an early spring feeling. This mixture flowers before the larger *Crocus vernus*.

# Blue Grass

Mixture of only white, blue and striped Crocus vernus.

# Colour Carnival

The classic Crocus vernus mixture with all colours. Like all crocus mixtures ideal for naturalising in grass.

# Jesperhus Mix

Gentle coloured from the Danish Jesperhus Blomsterpark. The white en purple colours softened by the creamy yellow brightens up the park every year.

M<sup>2</sup>  
80

30-50

4-5

## Dancefair

A cheerful mix of elegant lily flowering tulips in several heights. The combination of bold and more soft tone colours brings royalty to every garden.

# Silkeborg Mix

Mixture of 8 hardy varieties starting yellow and ending in white colours.  
Performs well in colder climates.

# Tiny Bubbles

A good mixture for early colour. This mix includes glory-of-the-snow, small tulips, muscari, snowdrops and crocuses. Good for naturalising in an informal landscape.

# Dynasty of Emperors

A Dynasty formed by the well-known Emperor Tulips in all its bright colours. These Fosteriana Tulips are well known for their ability to return 2 or 3 years.

# Garden Party

A mixture of the complete Van Eijk family. Each family member has the same strong characteristics: big, bowl-shaped flowers and a strong performance for 2-3 years.

# Little Rascals

Surprising what some little varieties can do. This mix of low growing varieties can easily compete with its taller competitors when it comes to brightening a garden

150 15-25 4-5

# Cool Waters

Subtle mix of cool blue muscari and daffodils that slowly mature to completely white, like sails on an ocean.

# Vanilla Sky

This long flowering mixture starts with several low flowering bloomers in soft colors and ends in a field of vanilla and black.

70

10-60

3-5

# May Romance

This mixture does exactly what its name says: creating romance in the wedding month of May.

# Spring Cocktail

The yellow and white flowering varieties brighten up every garden display and the soft pink tones give a little tropical touch to this mixture.

M<sup>2</sup>

70

25-55

3-5

# Babyshower

A nice mix of a bright pink tulip and a sweet fragrant narcissus.

# Purple Rain

The different shades and shapes of purple in this mix prove to be a good companion of the softer yellows. Surprising contrast with a great effect.

M<sup>2</sup>  
70

55

3-4

# Murillo Mix

This mix is a true explosion of colours. Nice, short tulips with strong stems. Excellent for pots.

# Smokey Mountains

The different shades of purple resemble The Smokey Mountains described by the native Indians as Mountains of the Blue Smoke.

# Mélange Paris

A mixture of long stemmed, late flowering tulips. Excellent for mass planting.

# Lilac Morning

A mix of different shades of pink, purple and lilac. The difference in height creates a multilevel show.

M<sup>2</sup>

70

30-50

4-5

# Lady Marmalade

A rich mixture of numerous varieties with a colouring from soft peach tones to bold orange. From low growing varieties to really tall ones. This mix has everything! Extremely long flowering period. The crown imperial give this mix an extra dimension.

M<sup>2</sup> 80-100  10-90  3-5

# Joy of Spring

This blend has been developed in the spirit of the historical Tulip Insulinde.

This blend contains more than 30 varieties. It includes early bloomers like crocus and iris. For the late season there will be tulips, alliums and camassia.

These varieties make up a soft Scandinavian spring theme.

M<sup>2</sup> 80-100  
10-90  
3-5

# From Dusk till Dawn

A mixture of bright coloured tulips topped off with tall fritillarias, which resembles sunrise and sunset in one mix.

M<sup>2</sup>  
80

↑  
10-90

☀️  
4-5

# Prince of Love

Mixture of tulips from the well-known "Prince" tulips. In this mix they prove to be a harmonious family.

# Grower's Pride

Very good mix with narcissi in all shapes and sizes. A guarantee for a very long flowering period.

# Morning Delight

Beautiful mixture of Delight® tulips in sparkling and playful shades of pink and red. These varieties are strong, early Darwin Hybrid tulips that are very suitable for the garden or for cutting.

M<sup>2</sup>  
70

55

3-5

A close-up photograph of a field of flowers. In the foreground, several bright red tulips are in full bloom, standing tall. Behind them, a dense carpet of small white crocuses covers the ground. The background is slightly blurred, showing more of the same flower mix. The overall scene is bright and colorful, representing the 'Victory of Alkmaar' variety.

## Victory of Alkmaar

A low-flowering mixture of kaufmanniana tulips and crocuses, an ideal combination for machine planting. Victory of Alkmaar is a lovely combination of the Hanseatic colours red and white. Or the colours of the city of Alkmaar or your favourite football club, of course. Other combinations at request.

# Capture of Brill

A low-flowering mixture of a beautiful kaufmanniana tulip and mixed crocuses.

This combination is ideal for machine planting in municipalities or parks. Other combinations at request.

120

15-25

2-4

# April Fools' Day

Mixed crocuses with a twist! Instead of the large-flowering yellow crocus, a beautiful yellow narcissus will show up, the ultimate surprise in March-April. This mixture is especially suitable for machine planting.

# Tulipa clusiana Mix

The classic mixture of low-flowering clusiana tulips in soft colours. Ideal for machine planting.

## Darwin Hybrids Mix

The most beautiful tulips in a fantastic mixture: darwin hybrid tulips in their soft colours are known as long-flowering tulips on firm stems and are an asset in every garden. Darwin hybrids are single-flowered, mostly available in the colour palette yellow-pink-red-orange and are excellent for group planting. Planted at the right depth (about 15 cm), they can continue to flower for a number of years in succession.

# Triumph Mix

An eclectic mixture of the most beautiful triumph tulips. Because of the different months of flowering, this mixture will be flowering for a number of months in succession. Tulip mixtures can be planted by machine and will easily infuse colour in an embankment, roundabout or sports park in spring.

70 40-50

4

# Welcome to our show and test garden

It is of course very nice to put together mixtures based on characteristics, such as flower shape, colour and height, combined with flowering time, but how can you be sure that it also works out well in practice and that all varieties are mixed in the right proportion? That is why we plant our own mixtures from the catalogue and mixtures designed by customers in our show garden.

This year we are happy to open our show garden to our customers so that you can take a look behind the scenes of mixing.

Mixtures can be very beautiful in their simplicity, such as Cool Waters, but can also be very complex and have a very long flowering period in shifting colour palettes, such as Lady Marmalade. Other mixtures can make an important contribution to biodiversity by attracting butterflies, bees and other insects. We can think along and help to put together a beautiful mixture for any purpose.

Don't hesitate to contact your local agent for advice and an appointment, and we'll see you soon in our beautiful show garden!

## Darwin Hybrid Tulips

Darwin Hybrid Tulips are all single-flowered cultivars with long-lasting flowers on strong stems. This type of tulip is very suitable for mass planting in a landscape setting or, with its height of 50-60 cm excellent as a cut flower. When planted at a depth of at least 15 cm, this group of tulips is performing well for several years. Mid-season flowering.

## Double Early Tulips

Double Early Tulips are hybrids of Single Early Tulips. Tulips are regarded double when they have more than six petals. Double Early Tulips are the first double flowering tulips to flower and have peony like flowers on short sturdy stems and are suitable for borders, mass planting or pots.

## Lily Flowering Tulips

This group of tulips is named for the shape of their blooms, which resemble old species tulips from Turkey. Their long, pointed petals arch outward and, when fully open, look like a six-point star. Most varieties are blooming late in the season and grow up to 50-60 cm and are not as sturdy as most other tulips. However their grace and elegance easily compensate this.

## Fringed Tulips

Fringed Tulips, also known as Crispa Tulips, are sports of Single Late Tulips. Accordingly, they are flowering late in the season. The edges of the petals are fringed, appearing to be frayed. The blooms are especially long-lasting. These elegant tulips are becoming more popular every year!

## Kaufmanniana Tulips

Kaufmanniana Tulips are, with some exceptions, generally low growing which make them ideal for rock gardens and containers. The flowers have pointed petals which open almost completely flat on sunny days. This type of tulip is also called waterlily tulip as a fully opened flower looks like a waterlily. The leaves are often striped or mottled. Early flowering and very suitable for naturalising.

Sweetheart

A close-up photograph of several Greigii Tulips. The flowers are in various stages of bloom, showing vibrant yellow and orange petals with distinct maroon or red streaks. The background is a soft-focus green, suggesting foliage. A white circular graphic element is positioned in the upper right corner, containing the title and descriptive text.

## Greigii Tulips

Greigii Tulips originated from *Tulipa greigii* species which are native to Kazakhstan. Greigii Tulips have large flowers compared to the plants as a whole. The flowers come in very bright colours often with two-toned petals and open wide in full sun. Greigii Tulips are ideal for rock gardens and pots as they are very short. The distinctive foliage is mottled with maroon stripes.

## Parrot Tulips

These tulips were developed from mutations of certain late flowering and Triumph Tulips. The flowers are large and have deeply feathered, curled or twisted brightly coloured petals. Parrot Tulips are somewhat sensitive to cold and wet weather so they require a somewhat protected spot. Flowering season is mid to late. They make excellent cut flowers.

## Single Late Tulips

This group, also known as Mayflowering Tulips, comes in a wide range of colours. Together with the Darwin Hybrid Tulips these are the tallest tulips. They have large, oval, almost egg-shaped flowers. Excellent as cut flowers.

A close-up photograph of several pink tulips. The central flower is in sharp focus, showing its six petals with a gradient from light pink to a deeper magenta. The background is filled with other tulips, some in focus and some blurred, creating a sense of a garden. A large white semi-circle is overlaid on the right side of the image, containing text.

## Single Early Tulips

One of the oldest groups of tulips in cultivation. These tulips are known for having very strong stems. This means they will stand up well to wind and rain. They come in a wide range of colours and are suitable for beds, borders and even indoor forcing.

## Species Tulips

Tulips that are wild, or close to wild, naturalise extremely well. As most tulips in this class are fairly short, they are absolutely ideal for rock gardens and pots. They also look wonderful when planted in large, one-colour flower beds.

# Bulbs in public green spaces

We have seen a growing interest over the years in the use of flower bulbs in public green spaces. Flower bulbs bring us the first colours after winter and provide that spring feeling so many people long for after the cold, dark months. In fact, no other type of planting gives splendour to beds, parks, verges and lawns in spring with such a diverse array of colours and shapes. In addition to bringing colour, variety and cheerfulness, flower bulbs also play an increasingly important role in encouraging biodiversity. By using the right species, they can provide food for butterflies and bees. The flowering period of bulbs can play a crucial role here, given there are hardly any other crops that are a source of food for these insects that early in the year.

Our aim at CSW Landscaping is to respond in various ways to the growing demand for flower bulbs for use in public green spaces. This starts with the composition of our range. While we have a wide selection of tulips and daffodils, CSW Landscaping also spends a lot of time and care selecting our range of special bulb and tuber flowers. Many species in this group are highly suitable for use in public green spaces because of their ability to flower for several years in a row and the possibility to plant them mechanically.

Our product range includes individual species for use in public green spaces as well as various mixes. These mixes can be composed of species that bloom almost simultaneously to create a spectacular display or can also be used to lengthen the flowering period. A carefully selected mix makes it possible to achieve a flowering period of between eight and 10 weeks.

To support our customers in implementing their planting plan, CSW Landscaping offers the possibility of having the bulbs planted mechanically (under grass) and can offer advice about our product range. CSW Landscaping has its own planting machines and, just as important, people with the right expertise to make every planting plan a success. Contact one of our employees, free of obligation, for advice about the best plan for you.

# NARCISSUS

## Trumpet Narcissus

Trumpet Narcissus have the “traditional” narcissus form. One large blossom per stem and the trumpet is very long. Specifically: the length of the petals or longer. These daffodils are well known for their long blooming season and their very large blossoms. Excellent for landscaping and naturalising.

## Large Cupped Narcissus

Large Cupped Narcissus is the group you see most often in gardens. Large Cupped Narcissus have a cup which is more than one third but less than equal to in length than the petals. This group of narcissus come in a wide range of colours and in a wide variety of cup shapes. Its flowers are extremely weather-tolerant and are suitable for every possible use: in beds, in borders, as a cut flower and for indoor forcing. Also suitable for naturalising.

Stainless

A close-up photograph of several yellow double narcissus flowers. The flowers are in various stages of bloom, showing multiple layers of petals. The background is a soft, out-of-focus green, suggesting foliage. The lighting is bright and natural, highlighting the texture and color of the petals.

## Double Narcissus

This class of narcissus has flowers that have extra petals, a double trumpet or even both. Double Narcissus come in a wide range of colours. Good as cut flower and very suitable for beds and borders. Some varieties require some protection from the wind.

## Split Corona and Papillon Narcissus

Varieties in this division have a very different flower form compared to the usual flower form. The term split corona refers to the cup which is split for at least 50% of its length. This makes that these varieties have open, upfacing flowers often resembling a hibiscus. Split Corona Narcissus varieties are suitable for mass planting and as cut flower. Most varieties flower mid-spring.

Apple Pie

Banana Splash

Cassata

Congress

Orangery

Parisienne

## Cyclamineus Narcissus

This division of Narcissus has straight slender trumpets and reflexed petals. The reason why this division is called cyclamineus is that several varieties from this group strongly resemble a cyclamen. Cyclamineus Narcissus is one of the first groups to flower in spring. As most varieties from this group are rather small they are performing better when planted close together or in front of the border. They are also excellent for rock gardens and indoor forcing.

Winter Waltz

## Jonquilla Narcissus

This division of Narcissus is known as the most fragrant division. The flowers come in a wide range of colours and have flat or slightly reflexed petals and a wide cup. The flower stems normally bear 2-6 flowers resulting in a long flowering period. They naturalise very well and flower mostly late in the season.

# Species Narcissus

This division contains different daffodil species in their wild (or reputedly wild) forms and hybrid Narcissi are derived from this group (distinguished solely by their Latin botanical name).

128

bulbocodium Golden Bells

obvallaris

## Poeticus Narcissus

This type of daffodil is also known as the 'poet's daffodil'. All species in this group have large white petals and a small corona in contrasting colours, often red and yellow, and are excellent for naturalisation. They have a lovely fragrance.

129

Actaea

poeticus var. recurvus

## Triandrus Narcissus

This group is known for its very colourful and long flowering period, not least because each stem contains more than one blossom. The somewhat pendant, nodding flowers have slightly reflexed petals. Most species from this group have a wonderful fragrance. These plants are suitable for use in pots and are known to be a superb naturalising daffodil when planted in a slightly shaded spot. The flowering period is from mid-April until well into May.

# The important role of bees

Over the last few years, there has been more and more interest in the role of bees within our ecosystem. And rightly so! Bees take care of the pollination of more than three quarters of our food crops. Without bees, there would not be any cherries, apples, peppers or even coffee.

It is therefore of the utmost importance to care about bees and to support them where we can because bees have been going through difficult years recently. Due to the gradual decline of their natural environment, both in terms of quality and quantity, bee colonies are under a great deal of pressure.

***‘Flowering bulbs are often the first source of nectar in early spring.’***

By taking a few simple measures, we can make their lives a lot more pleasant and easier. By sowing and planting the right crops, we can create an important source of pollen and nectar. Flowering bulbs can play an important role in this. Due to the early flowering period of the various bulbs, flowering bulbs are often the first source of nectar and pollen for bees in early spring when they appear after their winter rest.

At CSW Landscaping, we offer a broad assortment of flower bulbs that are a source of pollen and nectar. There are still a lot of differences between the varieties in terms of the production of nectar and pollen. Location and weather conditions also play an important role. There will be more pollen production on warm, dry days than on rainy days. We marked the varieties that attract bees with a special symbol  in our catalogue. Without bees there wouldn't be any flowers, so we are more than happy to foster their habitat.

# With an eye to the future

Corporate social responsibility is in the DNA of the CSW Group. As a company, we want to take responsibility for social issues such as air pollution and climate change. We therefore take a critical look at our business processes and are constantly optimising and making them more sustainable.

We started with the waste stream. The agricultural waste, cardboard, plastic and other waste is separated, disposed of properly and, where possible, recycled.

*‘The quality of the products comes first, with respect for people society and the environment’*

As a participant in the Dutch Sustainable Trade Platform, we contribute to a future-proof flower bulb and perennial sector. The quality of the products comes first, with respect for people, society and the environment. CSW Landscaping is also certified Florimark Good Trade Practice (GTP) issued by MPS-ECAS. With this we demonstrably meet the strictest requirements of governments, landscapers and gardeners in the field of environment, quality and social issues.

Our flower bulbs and other products meet all high EU standards and are purchased in a quality that is suitable for export to countries with strict import requirements, such as Japan.

In 2018 with a further expansion in 2021, a total of 2400 solar panels were installed on the roof of our business premises. The yield corresponds to the predicted annual usage of our company. With this we have taken a big step towards a carbon (CO<sub>2</sub>) neutral production process and since then we are certified with EU Energy Label A.

# More colour and biodiversity in the living environment

In addition to supplying and planting flower bulbs, we want to broaden our horizon.

In collaboration with Griffioen Wassenaar, we offer colourful, low-weed perennials for public green spaces, but also for projects such as offices and parking areas.

The great variation and the long flowering season mean that perennials make a major contribution to the biodiversity in the living environment. Perennials attract many different butterflies, bees and insects.

The perennials are sustainably grown in low-peat substrates, in an extra heavy pot size (P11) for a large root ball. The application of eight plants per square meter ensures rapid dense growth. As a result, weed growth has less chance and maintenance is manageable.

Because the costs of management and maintenance are considered, we work with specifically selected strong types of perennials.

Before planting, the soil is improved with a special substrate that adds a good amount of long-acting organic fertiliser to the soil. This ensures a better structure of the soil.

Every year after the winter, at the right time according to the carefully composed care plan, the perennials are mowed, fertilised and mulched in one go with a mulching machine. This annual treatment ensures an environmentally friendly way of feeding and rejuvenates the crop, which also ensures a long lifetime.

***‘Perennials attract many different butterflies, bees and insects.’***
