

Plants Of The Green Line - Woolsthorpe Section

A Flora Survey Conducted by Kevin Sparrow

On Behalf of Basalt To Bay Landcare Network & VicTrack

Funded by the Australian Government

Authors Note: The plant photos uploaded into the Atlas of Living Australia web site, have all been photographed on site. Some of the photos used in this report have been taken elsewhere and are used for illustrative purposes only. All photos used are by Kevin Sparrow.

Large Trees

Acacia mearnsii - Black Wattle

Local Indigenous Species

Tree 5 - 15 metres

Common and widespread species with a small population existing on this site. Evidence of some regeneration.

Acacia melanoxylon - Blackwood

Local Indigenous Species

Tree 6 -30 metres

Common and widespread species with a number of old, possibly remnant specimens existing on this site. Strong evidence of regeneration

Eucalyptus ovata - Swamp Gum

Local Indigenous Species

Tree 8 - 25 metres

Common and widespread species with a small population existing on this site. Evidence of regeneration.

Eucalyptus viminalis - Manna Gum

Local Indigenous Species

Tall Tree 25 -50 metres

Common and widespread species with a small population existing on this site.

**Populus alba* - Poplar

Introduced Species

Tall Tree 30 -50 metres

A small population, mainly suckers existing on this site.

Photograph by Lisette Mill

Small Trees & Shrubs

Banksia marginata - Silver Banksia

Local Indigenous Species.

Shrub or Tree To 7 metres

Widespread species now considered rare on the Volcanic Plains.

A number of very old, possibly remnant plants exist at this site.

A valuable seed source.

Bursaria spinosa - Sweet Bursaria

Local Indigenous Species.

Shrub or Small tree to 8 metres

Widespread species now considered rare on the Volcanic Plains.

Only a few remnant plants surviving at this site.

Exocarpos cupressiformis - Cherry Ballart

Local Indigenous Species.

Shrub or Small Tree 3 - 8 metres

Common and widespread species with only a few existing on this site.

Leptospermum continentale - Prickly Tea-tree

Local Indigenous Species.

Shrub 1 - 4 metres

Common and widespread species with a large population existing on this site, mainly in drainage lines. Strong evidence of regeneration.

Melicytus angustifolius subsp. divaricatus - Tree Violet VVP Form

Local Indigenous Species.

Shrub 1 - 4 metres

Uncommon species on the Victorian Volcanic Plain that could in future be classified as vulnerable because of declining populations due to clearing.

Notelaea ligustrina - Privet Mock-olive

Local Indigenous Species.

Shrub or small tree 2 - 8 metres

A widespread species (mainly in eastern Victoria) with a small possibly remnant population existing on this site.

**Acacia longifolia subsp sophorae - Coast Wattle*

Introduced Native Species.

A number of large specimens with about 6 smaller specimens.

Coast Wattle is a vigorous weed that should be removed before it has time to spread further.

**Crataegus monogyna - Hawthorn*

Introduced Species

Common Weed 5 - 10 metres

Only a few specimens that could be easily removed.

**Melianthus major - Cape Honey-flower*

Introduced Species

Common Weed To 3 metres

Only a few specimens that could be easily removed.

** Pyrus sp. - Pear Tree??*

Unidentified Small Fruit Tree - Introduced Species

Two only garden escapees.

Could possibly be heritage fruit trees.

**Rosa rubiginosa* - Briar Rose

An Invasive Introduced Species

Small population of specimens that could easily be removed.

Ferns

Pteridium esculentum - Bracken Fern

Local Indigenous Species.

Common and Widespread Remnant Species

Very common on this site

Lilies

Arthropodium milleflorum - Vanilla Lily

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Arthropodium strictum - Chocolate Lily

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Bulbine bulbosa - Bulbine Lily

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Burchardia umbellata - Milkmaids

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Caesia calliantha - Blue Grass-lily

Local Indigenous Species.

Common and Widespread Remnant Species.

Small Population on this site.

Dianella longifolia var. *longifolia* - Pale Flax-lily

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Dianella admixta/revoluta - Black-anther Flax-lily

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Hypoxis hygrometrica - Yellow Star

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site in wetter zones.

Hypoxis vaginata var. *vaginata* - Yellow Star

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site in drier zones.

Orchids

Microtis unifolia - Onion Orchid

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Thelymitra arenaria - Forest Sun-orchid

Local Indigenous Species.

Uncommon Remnant Species.

Small population found on this site that needs protection.

Herbs & Forbs

Acaena novae-zelandiae - Bidgee Widgee

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Acaena ovina - Sheep's Burr

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Bossiaea prostrata - Creeping Bossiaea

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Convolvulus angustissimus - Pink Bindweed

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Cynoglossum suaveolens - Sweet Hounds-tongue

Local Indigenous Species.

Common and Widespread Remnant Species.

Small Population on this site.

Dichondra repens - Dichondra

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Drosera hookeri - Sundew

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively Common on this site.

Geranium potentilloides var. *potentilloides* - Soft Crane's Bill

Local Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Gonocarpus humilis - Shade Raspwort

Local Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Gonocarpus tetragynus - Common Raspwort

Local Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Haloragis heterophylla - Varied Raspwort

Local Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Hypericum gramineum - Small St. John's Wort

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Kennedia prostrata - Running Postman

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Leptorhynchos tenuifolius - Wiry Buttons

Local Indigenous Species.

Common and Widespread Remnant Species.

Small Population on this site.

Lobelia pratioides - Poison Lobelia

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Lythrum hyssopifolia - Small Loosestrife

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Ornduffia (Villarsia) reniformis - Running Marsh Flower

Local Indigenous Wetland Species.

Common and Widespread Remnant Species.

Small population surviving in a drain line.

Oxalis perennans - Grassland Wood-sorrel

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Pimelea glauca - Smooth Rice-flower

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Ranunculus glabrifolius - Shining Buttercup

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Ranunculus lappaceus - Australian Buttercup

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Rubus parvifolius - Native Raspberry

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Rumex brownii - Native Dock

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Senecio glomeratus subsp. *longifructus* - Annual Fireweed

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Veronica gracilis - Slender Speedwell

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Wahlenbergia gracilentata - Annual Bluebell

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Wahlenbergia stricta - Tall Bluebell

Local Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

**Arctotheca calendula* - Capeweed

Introduced Species

Widespread weed that is difficult to control.

**Centaurium erythraea* - Century Weed

Introduced Species

Naturalised species with scattered occurrences on this site.

**Cicendia filiformis* - Cicendia

Introduced Species

Naturalised species with scattered occurrences on this site.

**Cirsium vulgare* - Scotch Thistle

Introduced Species

Established weed that is difficult to control.

**Diplotaxis tenuifolia* - Sand Mustard

Introduced Species

Established weed that is difficult to control.

**Erodium botrys* - Big Heron's-bill

Introduced Species

Established weed that is difficult to control.

**Galanthus sp.* - Snowdrops

Introduced Species

Small number of populations that can be easily removed.

**Hypochoeris radicata* - Flat Weed

Introduced Species

Widespread weed that is difficult to control.

**Leontodon saxatilis* - Hairy Hawkbit

Introduced Species

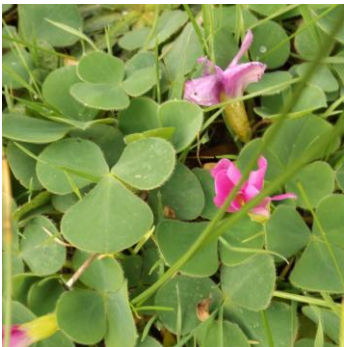

Widespread weed that is difficult to control.

**Narcissus hybrid* - Daffodils

Introduced Species

Small number of populations that can be easily removed.

**Oxalis purpurea* - Large-flowered Wood-sorrel

Introduced Species

Small number that might be difficult to remove.

**Parentucellia latifolia* - Red Bartsia

Introduced Species

Naturalised species with scattered occurrences on this site.

**Petrorhagia dubia* - Proliferous pink

Introduced Species

Naturalised species with scattered occurrences on this site.

**Plantago coronopus* subsp. *coronopus* - Buck's Horn Plantain

Introduced Species

Naturalised species with scattered occurrences on this site.

**Plantago lanceolata* - Plantain

Introduced Species

Naturalised species with scattered occurrences on this site.

**Sonchus oleraceus* - Sow Thistle

Introduced Species

Widespread weed that is difficult to control.

**Trifolium angustifolium* var. *angustifolium* - Narrow-leaved Clover

Introduced Species

Naturalised species with scattered occurrences on this site.

**Trifolium arvense* var. *arvense* - Hare's-foot clover

Introduced Species

Naturalised species with scattered occurrences on this site.

**Trifolium campestre* var. *campestre* - Hop Clover

Introduced Species

Widespread weed that is difficult to control.

**Vicia sativa* subsp. *sativa* - Vetch

Introduced Species

Naturalised weed that is difficult to control.

Grasses and Sedges

Anthosachne (Elymus) scabra - Common Wheat-grass

Indigenous Species.

Relatively common on this site.

Austrostipa pubinodis - Spear Grass

Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Austrostipa sp. - Spear Grass

Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Carex appressa - Tall Sedge

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Carex inversa - Knob Sedge

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Dichelachne rara - Plume Grass

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Distichlis distichophylla - Australian Salt-grass

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Eleocharis acuta - Common Spike-rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Ficinia nodosa - Knobby Club-rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Isolepis hystrix - Awned Club-sedge

Indigenous Species.

Common and Widespread Remnant Species.

Uncommon on this site.

Juncus amabilis - Hollow Rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Juncus bufonius - Toad Rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Juncus caespiticius - Grassy Rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Juncus holoschoenus - Joint-leaved Rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Juncus planifolius - Broad-leaved Rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Lomandra filiformis spp *coriacea* - Wattle Mat-rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Lomandra longifolia - Spiny-headed Mat-rush

Indigenous Species.

Common and Widespread Remnant Species.

Small population on this site.

Microlaena stipoides var *stipoides* - Weeping Grass

Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

Pentapogon quadrifidus var. *quadrifidus* - 5 Awned Spear-grass

Indigenous Species.

Common and Widespread Remnant Species.

Uncommon on this site.

Poa sp - Poa

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Rytidosperma sp. - Wallaby-grass

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Schoenus apogon - Common Bog-rush

Indigenous Species.

Common and Widespread Remnant Species.

Relatively common on this site.

Themeda triandra - Kangaroo Grass

Indigenous Species.

Common and Widespread Remnant Species.

Very common on this site.

**Acetosella vulgaris* - Sheep's Sorrel

Introduced Species

Naturalised species with scattered occurrences on this site.

**Aira cupaniana* - Silvery Hairgrass
Introduced Species
Naturalised species which is very common on this site.

**Aira elegantissima* - Delicate Hairgrass
Introduced Species
Naturalised species which is very common on this site.

**Anthoxanthum odoratum* - Sweet Vernal
Introduced Species
Naturalised species which is very common on this site.

**Avena barbata* - Wild Oats
Introduced Species
Naturalised species which is very common on this site.

**Briza minor* - Shivery Grass

Introduced Species

Naturalised species which is very common on this site.

**Bromus diandrus* - Great Brome

Introduced Species

Naturalised species which is very common on this site.

**Bromus hordeaceus* - Soft Brome

Introduced Species

Naturalised species which is very common on this site.

**Cynosurus echinatus* - Rough Dog's Tail

Introduced Species

Naturalised species which is common on this site.

**Dactylis glomerata* - Cocksfoot

Introduced Species

Naturalised species which is very common on this site.

**Holcus lanatus* - Yorkshire Fog-grass

Introduced Species

Naturalised species which is very common on this site.

**Isolepis levynsiana* - Tiny Flat-sedge

Introduced Species

Naturalised species which is uncommon on this site.

**Lolium multiflorum* - Italian Ryegrass

Introduced Species

Naturalised species which is very common on this site.

**Lolium perenne* - Perennial Ryegrass

Introduced Species

Naturalised species which is very common on this site.

**Lolium rigidum* - Annual Ryegrass

Introduced Species

Naturalised species which is very common on this site.

**Paspalum dilatatum* - Paspalum

Introduced Species

Naturalised species which is very common on this site.

**Phalaris aquatica* - Phalaris

Introduced Species

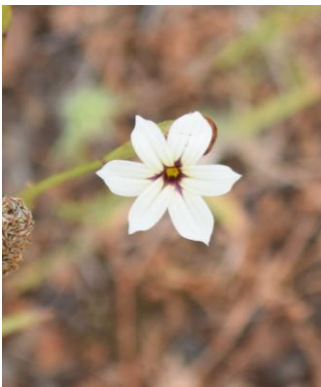

Naturalised species which is very common on this site.

**Romulea rosea* - Onion Grass

Introduced Species

Naturalised species which is common on this site.

**Sisyrinchium iridifolium* - Striped Rush-leaf

Introduced Species

Naturalised species which is very common on this site.
